WHO CAN USE WOODLAB?

Everyone from construction workers, furniture makers, carpenters, joiners, DIYers and hobbyists use us. We welcome all and offer training on machinery so that as many people as possible can use the machinery and tools.

We also offer contract cutting, wood drying, timber sourcing and much more.

SEE WHO USES WOODLAB:

Made-up Person 1: Sue

Sue plans the cost of using Woodlab into the pricing structure of her commissions. She has a small workshop of her own, but she can do certain things at Woodlab that she can't do at home. Well done Sue.

Made-up Person 2: Glen

Glen has enough work to occasionally pay for someone to help. When he's working with someone else, it's not legal for him to get other people to use his workshop as it doesn't meet safe-working requirements, so he books a bay at Woodlab for a week, and his number 2 smashes a load of stuff out. Nice work lads.

Made-up Person 3: Jim

Jim likes making stuff for his house, he has some tools, but doesn't need a load of stuff cluttering up his home and breaking the bank. Jim hires a bay at Woodlab during these times and triumphantly returns home with a new wooden item when he's finished. He's currently making a chair for his nan. Boss job Jim.

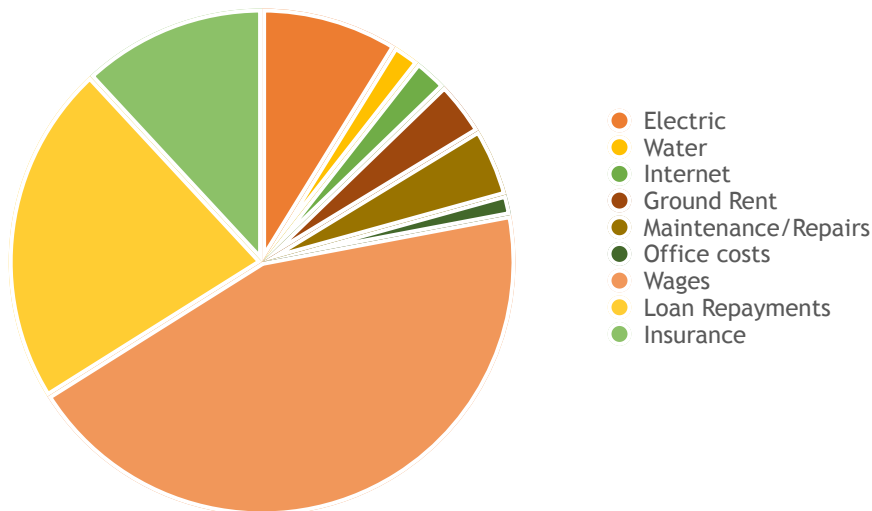

Made-up Person 4: BFP Ltd

Big Fat Project Ltd take on big projects! Sometimes, when they do, they hire out the whole of Woodlab and turn up with loads of wood to cut. They complete their cutting list and take it back to their workshop for assembly. Sterling effort team.

WHY DOES IT COST THAT MUCH?

We're not doing this for money. Our fees only cover the amount it costs to run and manage a workshop for you to use, and that's it. As a Community Interest Company our interest is in making it affordable as we can for you.

As we first open in 2020, without knowing exactly what our outgoings will be, we're taking our best shot at what that price is. This is roughly where the money goes:

Any money that comes in over that, goes towards improving Woodlab or towards our mission to make British Woodlands thrive.

INDUCTIONS, TRAINING AND COURSES

Even if you're a professional, we'll need everyone to complete an induction before using the workshop to meet health and safety requirements. Please note that use of the workshop is at your own risk and refunds or changes to bookings are only available up to one week before the date of induction.

LIST OF INDUCTIONS/TRAINING

#1: Workshop and Hand Tools – *By Appointment, 2hrs, Members included or £25*
Learning how to use our workshop and assessment on using the selection of hand tools. Compulsory induction to complete before using the wood workshop.

#2: Power Tools –*By Appointment, 4hrs, Members included or £40*
Learning how to use our workshop and assessment on using the selection of hand tools, including our Festool: rail saw, chop saw and Nova pillar drill. Compulsory induction to complete before using the tools unsupervised.

#3: Workshop Machinery *By Appointment, 2 Days, Members included or £100.00 per day*
Learn and assessment in using our Felder: K700s panel saw, FB510 band saw and AD951 planer & thicknesser. For those that have completed Induction #1 and have proved their competence with the chop saw, bandsaw & pillar drill for at least 3 days in the workshop, we offer a full day's training for using the table saw, thicknesser & planer. Even if you have used these machines before we still need you to complete the induction, so we can feel confident that you won't lose any fingers!

#4: Spindle Moulder/Router Table *By Appointment, 1 Day, Members included or £100.00 per day*
Learn to safely use our Felder F700 spindle moulder and router table, it takes it's own day because it's a ferocious beast that needs special attention and care. Even if you have used these machines before we still need you to complete the induction, so we can feel confident that you won't lose any fingers!

#5: Shaper Origin Handheld CNC Machine *By Appointment, POA*

Discover the Shaper and how to use this handheld CNC router power tool. From sign making to joint making, marquetry to templates, furniture components to wooden products. Even if you have used these tool before we still need you to complete the induction, there is lots to learn and we want to make sure that you know all the possibilities.

LIST OF TOOLS + MACHINERY

HAND TOOLS

Basic set of hand planes including:

Long low-angle jack plane for:

- Finishing
- Joining
- Trueing
- Chamfering

Smoothing plane No. 4

- Finishing and smoothing

Rabbit block plane

- Working on rebates and tenons
- Smoothing small workpieces

Clamps

A wide range of sizes and lengths of clamps and cramps to suit your requirements upto 1000mm.

POWER TOOLS

Range of Festool and other quality branded goods, the library of power tools will continue to grow over time. If you have a specific need of particular tool contact us and we may just have what you are after.

Festool TS 55 Rail Saw

**Festool DF-500Q
Domino Jointer**

**Festool EHL65
Power Planer**

Festool Rotex 90

**Festool DF-700
Domino XL**

Festool Sander DTS400

**Festool Eccentric
SaNDER ETS 150**

Festool Dust Extractors

Festool Drills

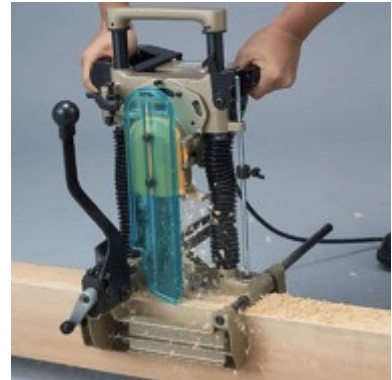

Makita Drill and Impact Drivers

Makita Cordless Jigsaws

Makita Chain Morticer

Makita Circular Saw 165MM LXT

Makita Rotary Hammer Drill

Metabo Corded Drill

Nova Voyager Pillar Drill

Mirka Pneumatic Orbital Sander

Air Press + Vacuum Bag

SHAPER ORIGIN

As the world's first computer-assisted handheld router, the Shaper Origin is the perfect tool if you need to create complex joinery, tight fitting box joints and much more! With Origin you can save time building templates and get straight to precision cutting. Plus, if you still need a physical template – Origin can build that too! Streamline your workflow with Shaper.

The Shaper does nearly everything a CNC can with the added bonus of being able to create joints and work on much larger pieces, your not limited to the table bed size like on a CNC.

WORKSHOP MACHINES

We have a well equipped wood workshop with some of the latest and high end machines from Felder. machines from Felder.

FELDER Sliding Table Panel Saw 740s

- Cutting length 2500-3700mm
- Sliding Table
- Rip capacity: 800–1250 mm
- Cutting height: 140 mm
- Scoring Blade

FELDER Planer/Thicknesser

- Planing width: 510 mm
- Jointer table length: 2,250 mm
- Cutterblock: Self-aligning blades
- Silent-Power® spiral cutter-block
- Planing height: 3–254 mm
- Feed speed: adjustable 4–16 m/min
- Felder Power Feed F38
- Planing table digital height adjustment
-

FELDER F700Z tilting

- X-Roll” sliding table
- Maximum ease of operation with “Power-Drive”:
electrical height and angle adjustment
- Felder spindle quick change system:
quick changeover from router table to spindle cutter
blocks
- Spindle tilts rearwards from 90°-45°
- Dual extraction through both the spindle fence and
from under the table
- Felder Power Feed F38
- Integral finger safety fence
- Adjustable crosscut fence
- Curved moulding hood

FELDER FB610 Bandsaw

- Electronically balanced, solid cast iron wheels.
- European Style upper and lower guides
- Saw blade tension indicator
- Cast iron table, tilt-able up to 45 degrees
- 2 Position (high/low) aluminium fence
- Cutting height 410 mm
- Rip capacity 575 mm

- Powerful combination aggregate with electro-pneumatic sanding shoe.
- Electrical height adjustment with digital display.
- Excellent results on veneered workpieces.
- Feeding belt control between 2.5-10 meters/min.
- Hand safety stop and stop to ensure that oversized pieces cannot be fed through, ensuring optimum operating safety.
- Vibration-free power transmission from the 10 hp sanding belt motor.
- Extended infeed and outfeed rollers.

BOOKING PROCESS

1. **Enquire** – Tell us what you want to do – fill in the [online form](#), we'll call you back
2. **Induct** – Book on to the induction/training for the tools you want to use. You can choose to become a member or not, it's up to you.
3. **Book** – Find the right time and space to get started
4. **Make** – Do your thing maestro

PAYMENTS

All payments for booking and using Woodlab are taken upfront via our [online payment page \(?\)](#).

CANCELLATION

- If you need to change the date of your booking we'll do everything we can to accommodate you. In some cases repeated or major variations to the booking (such as date changes) may incur a £10 administration fee.
- If you do need to cancel, your notice of cancellation must be made by email and will become effective on the date we receive it.
- Cancellation charges prior to the event booking may be applied as detailed below:

Up to 28 days	No charge
28 to 14 days	50% of the total cost
14 days or less	100% of the total cost

- TWP reserves the right to cancel a booking, if the holding of the event is prevented by circumstances beyond our control. We would of course refund any monies paid in advance although TWP does not accept any liability for losses incurred due to the cancellation of an event.

FAQ'S

Can I cut some stuff without booking a bay?

If you are a member of Woodlab you can arrange for use of just the machines without booking a bay, the price for this currently depend on the work you wish to carry out and the time you estimate you'll need. Contact us to discuss your project before booking.

What's the deal with kiln drying my wood?

Our kiln is nearly up and running, when it's all installed we will let you know.

Is it a Co-op?

We are a Community Interest Enterprise working towards being a Co-op, and thats where you come in... We are looking to talk to interested (and interesting) people that could see themselves fitting into the Woodlab ethos. We would love the Woodlab idea to grow, enabling makers to set up there own workshops and build a community of woodworkers and other woodland based businesses.

Is there good coffee?

The coffee and tea is off the chart, we have a modern kitchen with everything you'll need to brew up a storm. With a range of teas and coffee, decaf and herbals you will be well hydrated, though you will have to bring your own biscuits...and share them.

Can under 18's use the workshop?

Unfortunately not, our insurance just won't cover it.

Can someone cut the wood for me?

We do offer a machining service, with a £35 minimum fee and then an hourly rate of £25 after the 1st hour. We can cut to size.

Can I order wood through Woodlab?

We have large list of suppliers that our members use and we that can put you in contact with, however we can't order it for you.
