ADVANCED SUPPLIER MANAGEMENT

The demand on regulatory & compliance action is raising rapidly. Efficient document management becomes essential providing data at the right time. Artificial Intelligence can support this process by automated extraction of relevant supplier data.

MAKING CHANGE HAPPEN

SAIFTY is a platform combining AI with Cloud, which is integratable into different IT-modules as material master or warehouse management. It enable merger and contextualization of different data structures like financial & market data.

EU-CIRCULAR ECONOMY ACTION PLAN

| MAJOR GOALS	SUSTAINABILITY ACTION	OUTCOME
Product Transparency	Regulatory Compliance	Sustainable Innovation
Circular Economy	Supplier Selection	Attract Sustainable Investors
Reduction of Carbon/ Environmental Footprint	Improved Raw Material Properties	Improved working conditions and environmental impact

COAC SAIFTY – AI FOR COMPLIANCE & MARKETABILITY

AVOID COMPLIANCE ISSUES

As SAIFTY validates the extraccted information from different documents against international, regional and national requirements, e.g. GHS or REACH, incompliances are marked and outdated information from existing files is updated.

SELECT SUPPLIERS AND SUBSTITUTES

SAIFTY connects safety with other supplier data. By using ROBOTS, data models can be created. Find alternative raw materials and suppliers comparing distances, sustainability prices, and quality.

Scan safety-related documents with SAIFTY-Scan

SAIFTY-ROBOTS extracts all relevant information

SAIFTY-Cloud saves files structured and anytime available
