

IMPROVE AVAILABILITY OF OHS DATA

Since OHS regulatory requirements become aggravated, providing safety information to line managers and employees immediately and on-demand is crucial. Storing the data in a common access point contributes to that.

MAKING CHANGE HAPPEN

SAIFTY is a platform combining AI with a cloud solution. Efficient OHS document management using Artificial Intelligence can help to rapidly present important safety information.

COAC SAIFTY – AI FOR OHS COMPLIANCE

DIGITALIZE SAFETY DATA INFORMATION

Digitalize safety documents and store them in the SAIFTY-Cloud. The structured interface and Q&A function facilitate the search of necessary documents. Measures for protection of employees and behaviour in case of accidents can be displayed immediately.

ENSURE SAFETY, PREVENT INCIDENTS

SAIFTY-ROBOTS analyzes safety data from documents and compares product properties to internal and external standards. Problematic chemicals, e.g. substances of concern can be identified and substituted.

Scan safety-related documents with SAIFTY-Scan

SAIFTY-ROBOTS extracts all relevant information

SAIFTY-Cloud saves files structured and anytime available
