

# Quick Start Guide

## Gas Generator

For more assistance: Scan this QR Code for a direct link to the LiveView Packing and Quick Start Guides. You can also visit [www.liveviewtech.com/install](http://www.liveviewtech.com/install) . If you need additional help, call LiveView Technical Support @ 888-588-9408 Opt 2.

### STEP 1

Carefully pivot solar panel in the upright position and rotate the solar panel away from the generator housing.

Unlock and open the generator lid as shown.

### STEP 2

Carefully fill generator with 12 gallons of regular (octane 85) unleaded gasoline with the correct amount of Star Tron Fuel Stabilizer for 12 gallons of gasoline. Note: amount may vary based on concentration.

Star Tron Fuel Stabilizer is available at Wal-Mart and several online stores.

### STEP 3

Gently close and lock the generator housing lid as shown.

### STEP 4

Unlock and open the Battery Box lid on the same side of the trailer as the generator. Turn on the generator control plate using the toggle switch (circled in green).

### STEP 5

Manually start the generator by holding down the two buttons on the left labeled "START" until the controller alternates displaying:

"Auto Mode [COUNTDOWN]" and "Manual Run".

### STEP 6

You have now completed the generator set up. The generator is now in Auto Mode and will run its first cycle.

To finish, slowly close and lock the Battery Box lid.
