# CAPABILITY STATEMENT

## Automated remote deterrence and detection

LVT systems proactively protect infrastructure, assets, and personnel using automated deterrence methods, edged-based AI computer vision, and advanced IoT analytics.

## DIFFERENTIATORS

- » Rapidly deployable and relocatable
- » AI event-driven alerts
- » Platform-as-a-service (PaaS)
- » Low metered data consumption
- » Low power consumption
- » Turnkey
- » IoT orchestration and edge computing
- » Automated behavior and data gathering
- » Cloud-based VMS
- » Proactive deterrence methods
- » Real-time system health monitoring

## PAST PERFORMANCE

**NAICS:** 532490, 238210, 238990, 334220, 334290, 513210, 541519, 541690, 561621

Contract Holder  
#47QTCA23D00DN

## CORE COMPETENCIES

- » Physical security
- » Perimeter security
- » Force multiplier
- » Force protection
- » Threat deterrent
- » Intrusion detection
- » Crime prevention
- » Evidence collection
