CARDIOVASCULAR AND THYROID CANCER PREVENTIVE SCREENING
Screening will be at Heartscan Services Levittown
Please call 1-866-518-1112 to schedule your appointment

We hope you will take advantage of this lifesaving screening.

ABOUT THE FIVE SCREENS

This preventive screening program focuses on identifying early stages of heart disease, carotid (stroke), **thyroid cancer (nodules)**, aortic aneurysm, and PAD.

THYROID NODULE SCREENING- to identify nodules that are difficult to feel. *National data- thyroid cancer fastest increasing cancer in the US.*

ECHOCARDIOGRAM - looks at the size, shape, and movement of the heart. *Heart disease is the #1 disease in the US.*

CAROTID ARTERY ULTRASOUND - can identify plaque in the carotid arteries which can lead to stroke. *#3 disease for men and women/ on average, one American dies from stroke every 4 minutes.*

AAA -AORTIC ANEURYSM - most patients don't show symptoms. This test identifies an enlarged abdominal aorta, which may suggest the presence of an aneurysm. A ruptured AAA can cause blood loss, shock, and possible death.

ABI- ANKLE BRACHIAL INDEX - ABI test checks for peripheral artery disease (PAD). If you have PAD, you're more likely to have a stroke or heart attack.

Heartscan Services is HIPAA compliant and all results are **strictly confidential**. Screening is non-invasive.

**Main address:
3000 Hempstead Turnpike, Suite 417 (4th floor)
Levittown New York**
