

DECON 7

GENERAL DESCRIPTION

Decon7 (D7) is extremely versatile and can be used as a disinfectant, sanitizer, and a powerful decontaminate for many hazardous compounds, including toxic organic and metal substances. It is proven effective to kill most known pathogens. D7 penetrates to remove biofilms, killing up to 99.9999% of contained bacteria, saving time and preventing future growth and outbreaks. It is effective without the need for mechanical action, and in extreme temperature ranges.

PHYSICAL PROPERTIES

APPEARANCE: colourless liquid

FOAMING: high

ODOR: mild

DENSITY: 8.6-8.75
lb/gal

pH (concentrate): 9.3-9.8

SOLUBILITY IN WATER:
100%

DIRECTIONS FOR USE

D7 can be used as a disinfectant, virucide, fungicide, food contact sanitizer and deodorizer on hard, non-porous surfaces in buildings, farms, processing equipment, and transportation vehicles.

See label for specific instructions for use.

SAFETY

When handling concentrated chemicals, follow the guidelines listed in the Safety Data Sheets (SDS). PPE must be worn at all times. Avoid eye and skin contact. Any direct contact with eyes can cause irreversible damage. Always use in a well-ventilated area.
