### TEMPSURE RF FACE AND BODY SKIN TIGHTENING:

TempSure is a non-surgical, painless facelift! TempSure Envi is a gentle new radiofrequency treatment that minimizes facial fine lines and wrinkles by stimulating new collagen growth and tightening the skin. TempSureFirm helps smooth cellulite and tighten loose skin on the body. This procedure is safe for all skin types and levels of sun exposure, so it fits perfectly into any beauty maintenance routine, any time of year. 99% of patients reported the treatment to be pain-free so you can sit back, relax, and enjoy your TempSure treatment today!

### DIAMOND GLOW:

Diamond Glow is more than a facial. Unlike traditional wet facial treatments, which rely on chemical exfoliation to treat the skin at the surface level, Diamond Glow's patented recessed diamond tip wand delivers a next-level resurfacing treatment that deeply cleans and rejuvenates the skin. The wand simultaneously exfoliates, extracts debris, and infuses the skin with professional-grade Pro-Infusion Serums when pores are open and most receptive. Choose from pore-clarifying, hydrating, Vitamin-C, brightening, or growth factor to customize your glow!

### HYDRAFACIAL:

HydraFacial is a non-invasive treatment for all skin types with no downtime. HydraFacial incorporates exfoliating the skin with both a physical and chemical peel. It offers pain-free extractions while it nourishes and detoxifies the skin. This unique treatment can incorporate lymphatic drainage to detoxify and reduce inflammation. We can also incorporate blue or red LED treatment depending on your skin condition. There is no other treatment that will give you such a comprehensive result while you enjoy a relaxing facial!

### HYDRAFACIAL KERA VIVE

Show your scalp some love! The NEW HydraFacial Keravive treatment uses vortex technology and Keravive Peptide Complex Solution to cleanse, exfoliate, stimulate, and deliver a proprietary blend of growth factors and skin proteins to hydrate, nourish and stimulate the scalp. The result? Thicker, fuller, healthier-looking hair!

### CHEMICAL PEELS:

Chemical peels are safe and effective aesthetic treatments that can improve skin color, tone, and texture. A chemical peel removes the outer layer of skin to reveal smoother and healthier new skin. We offer an array of chemical peels from gentle to strong to treat all skin types and customize individual needs.

### FACIAL SERVICES:

We offer a 5 Step Medical Facial, a Microdermabrasion Facial, a Dermaplaning Facial, and a ZO Anti-Aging Firming Facial.

### OTHER SERVICES:

Brow Waxing & Tinting

### MEDICAL GRADE SKIN CARE:

Healthy skin includes the use of medical-grade skincare products. We carry the following lines: ZO Skin Health, Revision, Elta MD, Avene, Neocutis, Latisse, Upneeq, Nutrafol, Glo Skin Beauty, SkinBetter, TSG Clinical, and Colorescience.

### THE SKIN GROUP SKINNY

Join us every **FIRST WEDNESDAY** of the month from 12:15-1:00 PM on Facebook & Instagram LIVE! Learn more about our aesthetic services, and have your questions answered in real-time!

# AESTHETIC SERVICES

## **BOTOX/DYSPORT/XEOMIN:**

Botox, Dysport, and Xeomin are the most popular and effective neuromodulators on the market today. These injections temporarily relax overactive facial muscles that cause wrinkles and lines to form in between your brows (glabellar) and on the sides of your eyes (crow's feet), and cause fine lines above the lip and heavy forehead furrows.

## **KYBELLA:**

Kybella is the first FDA-approved permanent injectable treatment that destroys fat cells under the chin to improve your profile. The active ingredient in KYBELLA® is synthetic deoxycholic acid. Deoxycholic acid is a naturally occurring molecule in the body that aids in the breakdown and absorption of dietary fat. When injected into the fat beneath the chin, KYBELLA® destroys fat cells, resulting in a noticeable reduction in fullness under the chin. At each treatment, small injections are made under your chin and the number of injections/treatments will vary by patient.

## **PRP HAIR RESTORATION:**

PRP Hair Restoration injections are meant to thicken, strengthen, and grow hair from follicles that are still functioning, however weak they may be. PRP injections can be effective in treating male/female pattern baldness, both in preventing hair loss and promoting new hair growth. PRP can also aid in the stimulation of hair growth after hair transplants. Once your PRP is collected it is injected into specific areas of the scalp suffering from hair loss or pattern baldness. You'll need to complete a series of four to six treatments to achieve real PRP hair treatment results, and you'll be able to enjoy new hair growth for about 18 - 24 months. Because PRP is not permanent, touch-up treatments are recommended once a year.

## **1540 Fractional Laser (Laser Skin Renewal):**

The 1540 laser effectively addresses fine lines and wrinkles, crepey skin, crow's feet, fine lines around the mouth, neck wrinkles, scarring, enlarged pores, melasma, and hyperpigmentation. The 1540 is a non-ablative laser that divides up light energy into microbeams that target surface skin cells and the skin's mid-layers. This allows the body to naturally begin its defensive wound-healing process which increases collagen and elastin production, resulting in a more youthful appearance. One treatment will achieve amazing results. Multiple treatments can drastically revitalize the skin's appearance.

## **SCULPTRA:**

**Sculptra (also known as a liquid facelift) is a Poly-L-lactic facial injectable that helps stimulate your own natural collagen production. Sculptra targets fine lines, wrinkles, sagging, and other signs of aging due to collagen loss, gradually helping restore skin structure and volume. Results include natural-looking firmness and improved skin quality with results seen as early as 1 month after the first treatment and lasting up to 2 years. Three treatments are recommended 30 - 45 days apart.**

## **PRP (Platelet Rich Plasma):**

PRP Therapy is a form of regenerative medicine that harnesses and amplifies the natural growth factors found in our blood cells. Platelet-rich plasma consists of two elements: plasma, or the liquid portion of blood, and platelets, a type of blood cell that contains growth factors that can trigger cell reproduction and stimulate tissue regeneration or healing in the treated area. To create platelet-rich plasma, clinicians take a blood sample from the patient and place it into a device called a centrifuge that rapidly spins the sample, separating out the other components of the blood from the platelets and concentrating them within the plasma. The PRP is then collected and injected into the tear troughs, nasolabial folds (smile lines), or scalp.

## **PRP MICRONEEDLING:**

Once your PRP is obtained the traditional Microneedling procedure will begin. Your PRP is infused into the small microchannels made by the microneedling pen to encourage collagen production and cell reproduction. The addition of PRP to microneedling may speed up the healing process and stimulate skin renewal, potentially producing better results than Microneedling alone. PRP Microneedling treats acne scars, surgical scars, wrinkles and fine lines, hyperpigmentation, sun damage, large pores, and uneven skin texture.

## **MAX G IPL LASER:**

This safe, simple, quick procedure can easily clear unwanted brown spots, vascular areas, or rosacea from your face, hands, arms, chest, and neck, revealing a glowing, more even complexion.

## **LASER HAIR REMOVAL:**

**Say Goodbye to Unwanted Hair! Stop shaving, waxing, and tweezing! With our laser hair removal treatments, you can quickly and easily reduce unwanted hair on your body or face with longer-lasting results. Treatment areas include face, underarms, arms, legs, back, bikini, chest, and more!**

## **INJECTABLE DERMAL FILLERS:**

Injectable Hyaluronic Acid (HA) Dermal Fillers replace lost volume, enhance lips/cheeks, reduce wrinkles, rejuvenate the skin, and smooth out the signs of aging. HA is a naturally occurring substance that keeps skin moisturized, plump, and soft. Dermal fillers are nonsurgical options that contain a modified form of HA. Each one adds volume and is designed for different needs in specific areas of the face including lips, cheeks, chin, smile lines, or jawline. We carry the Juvederm and Galderma family of dermal fillers.

## **PRP FACIAL INJECTIONS:**

**PRP is injected in places such as your smile lines (nasolabial folds) and under the eyes (tear troughs) to diminish dark circles and aid in skin rejuvenation. The growth factors, platelets, mesenchymal stem cells, and cytokines in PRP can help repair the tissues around your eyes, leading to a smooth, rejuvenated appearance. When the PRP serum is injected, it begins a healing surge to clear away excess pigmentation and fluids under the skin, and rejuvenate the delicate tissue under the eye.**

## **MICRONEEDLING:**

Microneedling is a minimally invasive cosmetic procedure that involves creating microchannels in the skin with tiny sterilized needles. During this procedure, we infuse those small wounds with peptides and growth factors that amplify your body's ability to stimulate collagen and elastin, which heal your skin and help you look younger. It is also called collagen induction therapy. Microneedling treats acne scars, surgical scars, wrinkles and fine lines, hyperpigmentation, sun damage, large pores, and uneven skin texture.

## **THREE FOR ME LASER TREATMENTS:**

Using a combination of the 1540 Fractional Laser and the Max G IPL Laser, Three For Me is a laser treatment that addresses multiple key skin concerns—wrinkles, sun damage, and blood vessels (hence the name “Three for Me”)—in a single session. Because the dual treatment only minimally impacts the skin's surface, recovery time is quick. Most patients start with a series of one - three treatment sessions at one-month intervals. One study reported a clinically significant improvement in signs of sun damage after only two treatment sessions, with 90% of patients saying their skin was clinically improved. We are proud to offer the solution to reverse the signs of aging and skin damage at the same time. The ultimate skin rejuvenation treatment!
