TACTICAL ANALYSIS

Quality technique

He is a footballer with a great technique capacity. His control, driving and distribution of play are elegant due to his awesome ball control. Through his technical gestures, he can get rid off rivals in offensive 1v1 duels. Then, he generates breaking-line passes or small-sided associations to advance.

One-touch play

It is necessary to be accurate when passing and have a good location on the field in order to play an one-touch play. Kökçü got it. Regardless the type of pass he receives, he knows how to control it and pass it near their foot right. He is very dynamic.

Vision of play

He is capable of making breaking-line passes, assisting in the last third of the field and making diagonal long balls to put teammates in advantage. Once he finds it, he leaves a lot of players back and puts his teammates in front of the goal.

TACTICAL ANALYSIS

Transition into attack

He is a key player in transitions into attack. His technical quality allows him to generate vertical passes to put his teammates up to box. Through his dynamism, he can pass it and instantly become an option of pass while either running or staying static to manage the tempo of play.

Polyvalence

Due to his technical and tactical qualities, he is a great player to play in different positions. He can play both as a holding midfielder to help while building up from the back and on a box to box role. He also performs as a free player around the field to attack from many flanks and generating passes in the last third of play.

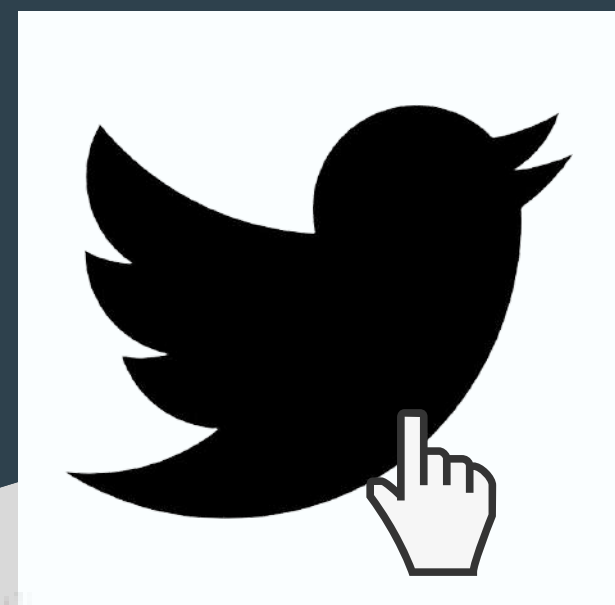

Shooting

He has a great shooting technique. He demonstrates it while taking set pieces or making lateral crosses. Also, he has scored many goals in open play from outside the box. His shots are direct and powerful. He looks for shooting it up and hard, making it impossible for the rival goalie.
