La Pizarra del DT

STATS IN VENEZUELA

DYNAMISM

He shows mobility up front to either play in between the lines or support on the sides. Also, he is capable of unmarking into space.

DIRECT PLAY

He is a reference for his teammates on the rival's half. When they send aerial or ground passes toward him, he tries to hold the defender and control the ball to make the play easier.

DROPPING BACK

Sometimes he drops back to the middle zone to become a passing option. He can give support to pass the ball and then receive it back while being in between the lines.

TACTICAL ANALYSIS

NEXT

IN THE BOX

He usually solves the play with a few touches. He prefers to finish or assist the play with one or two touches, leveraging the space and ending up the action. He dribbles well in the box.

DEFENSIVE ROLE

He participates when pressing up the rival's defensive line. He forces to divide the ball. He also prevents the rival from advancing by blocking passes and then regaining the possession.

BODY USE

Since he is an attacker, he has to deal with many ground challenges. He can hold the opponent with his back to the goal or by jumping high. He uses his body well to confront the rivals.
