POSTING TECHNIQUE

He has great capacity to play with his back to the goal. He is not a static player, but tries to drop back and associate with the midfielders. He holds it well due to his good individual technique, which allows him to link with his teammates.

He shows mobility up front to either play in between the lines or support on the sides.

Also, he is capable of unmarking into space. He is smart to read the play and make a diagonal run to the free space.

SHOOTING

He has a great mid-range shot. He does it with power and accuracy. He scores goals and generates situations through his shooting technique.

He frequently drops back to associate. He is also capable of moving in between the gaps generated by the centre-backs and fullbacks. This way he receives through balls in behind the defenders.
