STATS IN ROMANIA

BACK AND FORTH

He runs back and forth, which makes him a great player in offensive and defensive transitions. He supports the winger making 2v1 on the flanks to generate a clear lateral cross or in between the lines pass.

TECHNICAL ABILITY

His technical capacity not just generates advantages by driving, controlling and passing, but he is elastic to fake movements then switch direction and change pace to guide the transition.

LATERAL CROSSES

He shows off good shooting technique both while moving and statically. He has good skills for lateral crosses and shots from outside the box. He makes several quality passes in his career from the flanks.

BUILDING-UP PHASE

He makes the game dynamic both when building up from the back and in organized attacks. He understands how to make off the ball movements to take advantage of the situation, control the ball and forward into attack.
