

# Butterfly Effect 80

This sculpture was completed in August of 2018 and then on display at SUNY Oswego through July 2021, having been selected in a juried competition. It is self-powered using a deep cycle solar battery and stores enough energy to power 20, one-watt LED landscape lights. *Butterfly Effect 80* represents the studio's first step toward creating larger sculptures that marry form and function.

*Butterfly Effect 80*, 2018, Aluminum, stained glass, solar panels & controller, 26.5 x 53 x 21 inches (Patent D874332)
