

**Downtowner**

**Our transit software can run the show for you, decreasing operating costs and increasing the level of service.**

Define where riders can go with **on demand services** or **design custom routes** and stops for your guests. A custom rider app makes using your transit easier than ever.

## Benefits to your business

### Elevate rider experience

Request a ride or view a route with the tap of a button. No more calling in to wait on hold and not knowing where the driver is.

### Increase quality control

Riders can leave ratings and comments after each ride, giving management timely feedback. Admin tools allow for in depth oversight of every trip.

### Reduce labor costs

Fully automated dispatching assigns rides to drivers, grouping those heading in the same direction. No dispatchers needed. Less drivers needed.

### Automated reporting

Reporting on any rider, driver, property, or service line segment is just a click away. Ditch the hours spent on spreadsheets and paper recordings.

*“The Downtowner app-based technology has exceeded our expectations from the very first day. The app has increased efficiency and dramatically improved the transportation experience for our owners and guests in Empire Pass”*
