

# BOPP White Label Film - Lighter, engineered for performance & created for tomorrow

## LMW2 38

With its ultra high yield, LMW2 38 is a next generation white voided wrap around label film that fulfills your sustainability needs.

Thanks to its engineered surface optimized to give a smooth pearlescent bright finish that increases product presence on the shelf, LMW2 38 is the most sustainable wrap around white voided label film available to brand owners in the region.

### Characteristics

- Ultra-high yield
- 38-micron
- 0.55 Density
- High white index
- Monoweb or laminate structures

### Performance

- Designed for zero downtime
- High labeling speeds
- High surface energy for excellent printability
- Compatible with UV & solvent inks on Roto, Flexo and Off-set machines
- Designed to be compatible with various labelling machines
- Enhanced slip properties for consistent labeling performance

### Sustainability

- Thanks to its reduced GSM (20.9) LMW2 offers material saving of almost 12%, thus making it the most sustainable label film available in the region
