- Galvanised steel structure bent to "L" shape in order to preserve the strength of the steel.
- Custom-tailored decorative engineered wood panels with a life expectancy of up to 60 years, low maintenance, and with an unlimited range of architectural designs and like for like replica options.
- Most advanced motorized locking systems with keyless entry options including biometric readers, keypads, smartphone applications, and the possibility to connect with smart home systems..

About Us

At Armored Doors, our team is committed to providing high-caliber security doors, windows, and safe rooms that align seamlessly with original designs and architectural plans. Our security solutions are centered on sophistication, offering nearly indestructible protection against weaponized attacks and break-ins alike.

Whether you're seeking to reinforce your properties with more secure entryways after an incident or develop an ultra-secure building throughout the building process, our Armored Doors team is here to support you with custom-tailored solutions.

As part of our commitment to quality, we carry out our material selection and development processes with fireproofing, soundproofing, and waterproofing in mind. In turn, we build 360° solutions that stand the test of time. As a result, bullets, locksmithing devices, and drills don't stand a chance.

We are adept at building state-of-the-art security products that are custom-made for any design specifications you need.

Thank you for trusting our team at Armored Doors, and we look forward to hearing from you.

Our expertly crafted bespoke security doors provide unparalleled strength while being offered in a wide variety of designs and styles. Our beautiful styles cater to any design brief, from historical buildings to new builds and modern apartments. Our designs are manufactured to exact standards and the highest quality. You don't compromise on style, and we never compromise on security.

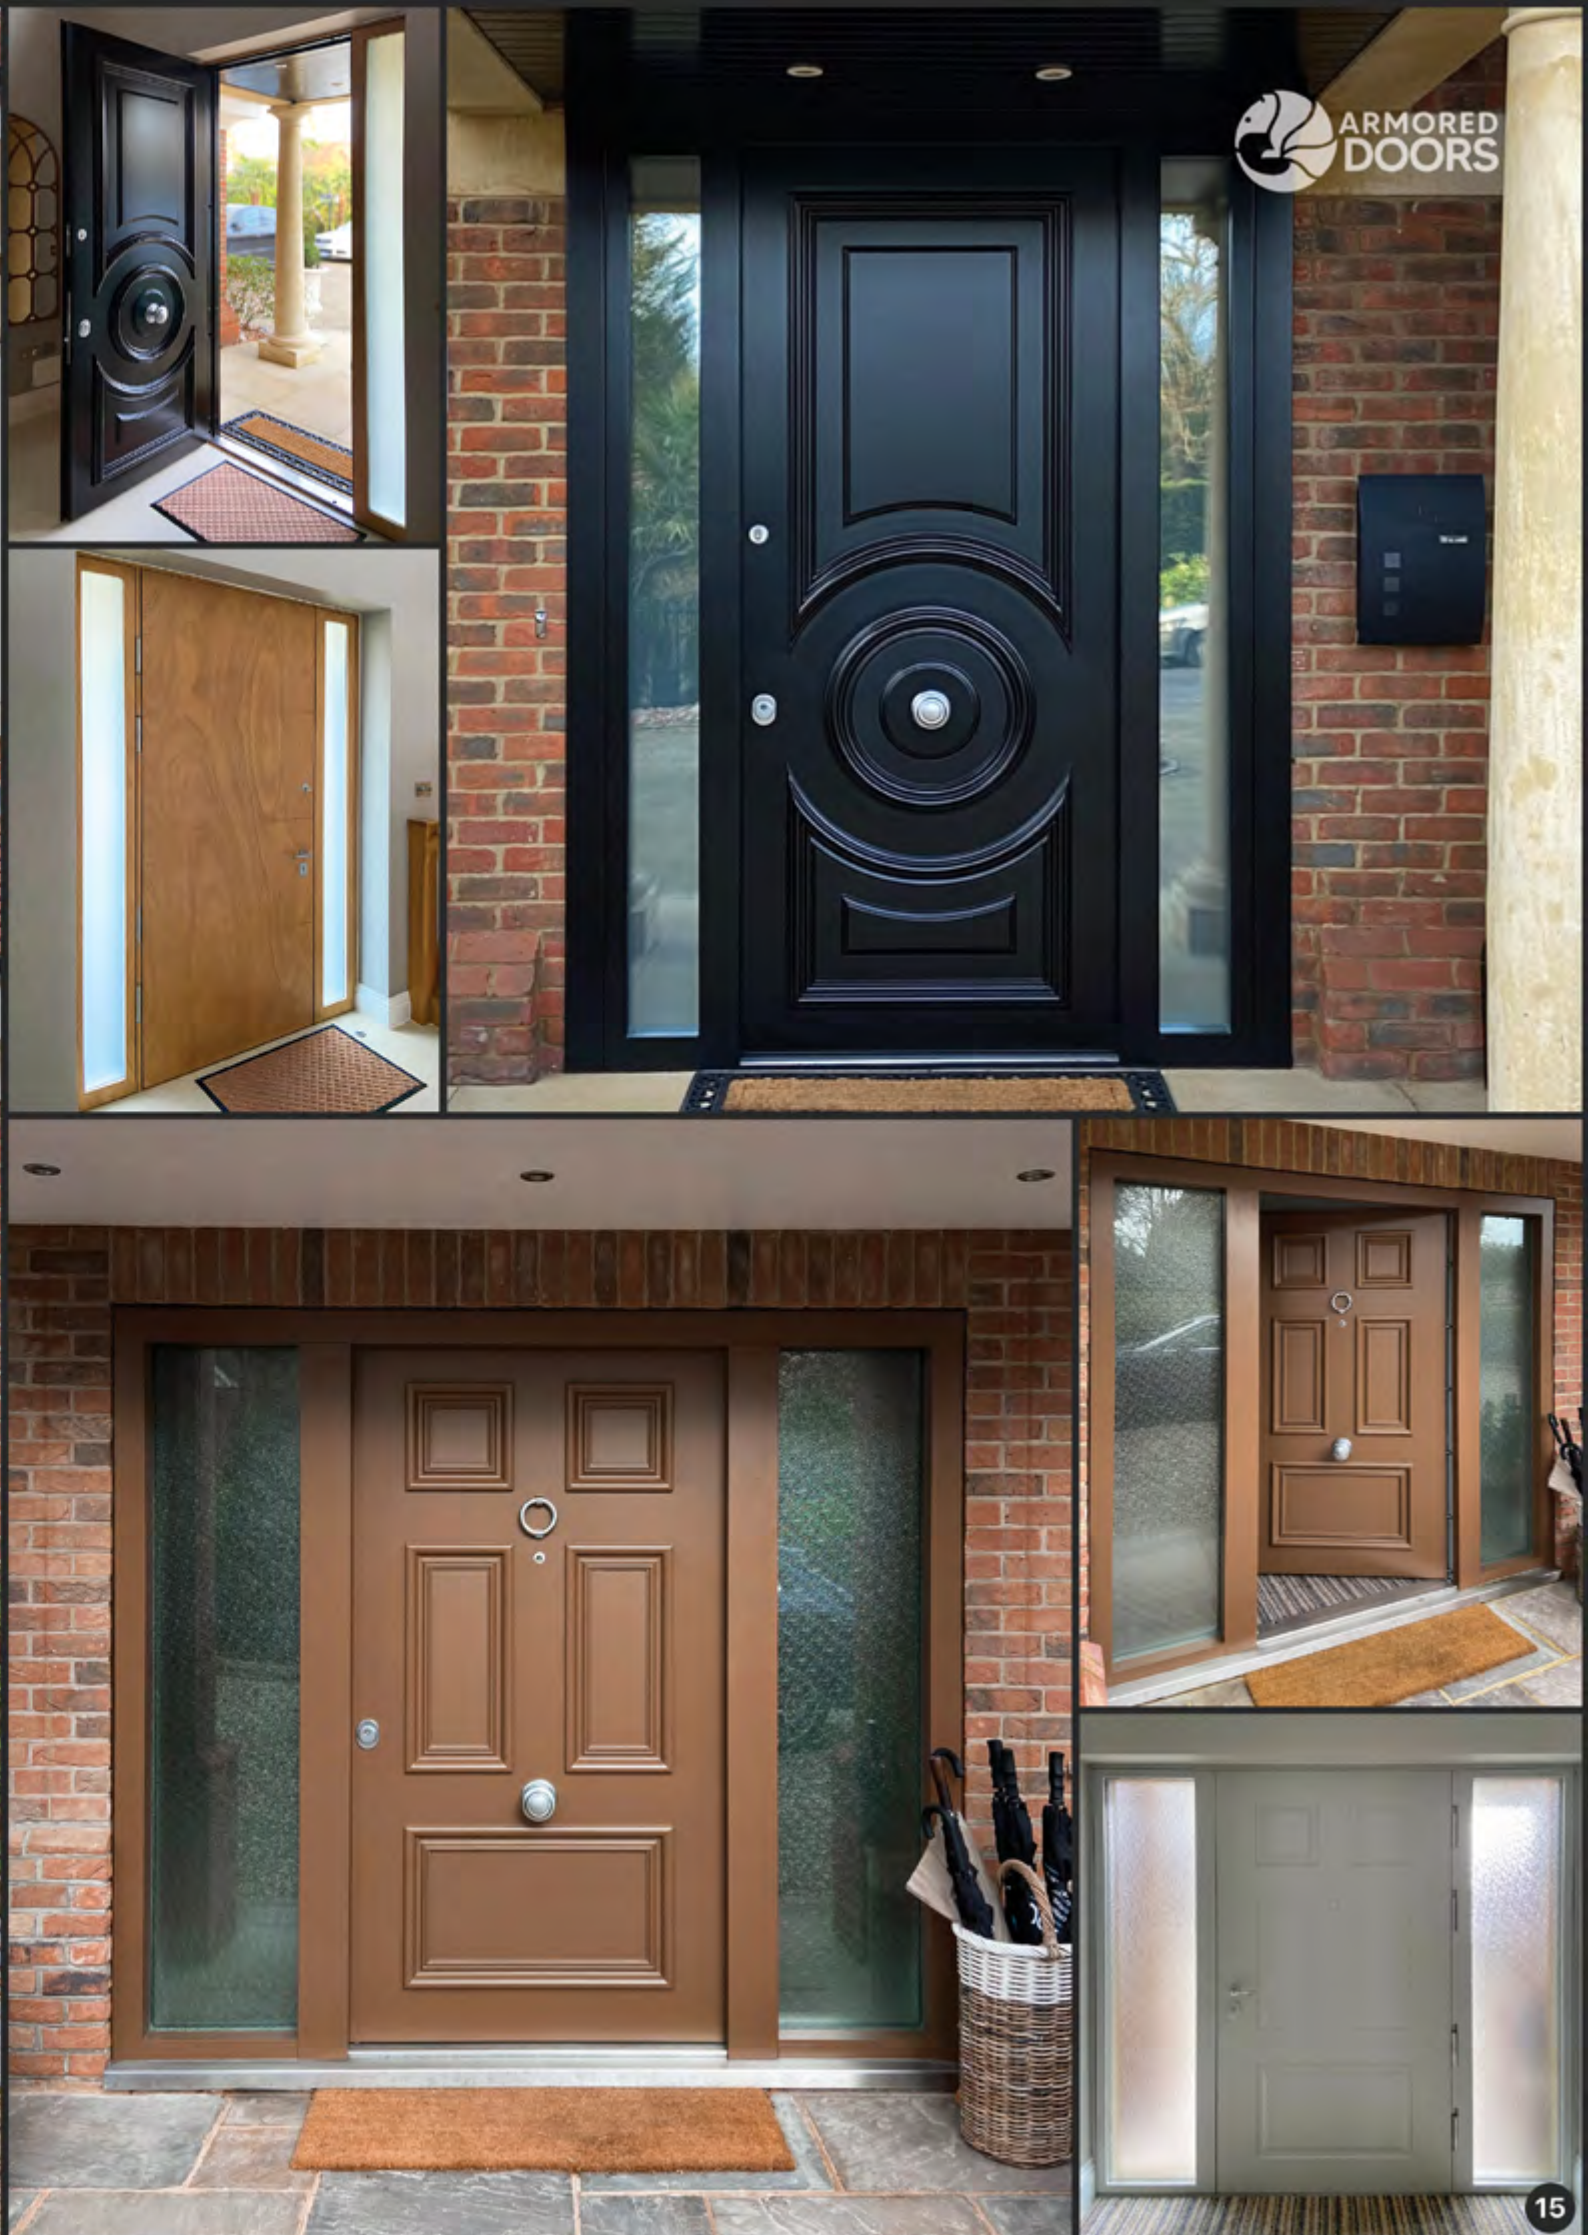

The main entrance to your home plays an integral role, welcoming people and serving as your home's design centerpiece. However, it does far more. Your entrance door plays a key role in the safety of your home while also contributing to your home's energy efficiency.

Armored Doors now gives those with heritage homes and buildings the opportunity to enjoy the many benefits of steel doors. You can now have the security and insulation of steel doors without compromising on heritage requirements. Armored Doors is able to design and build steel door solutions that perfectly match the exact details of your heritage building. Whether it is a heritage replica or a bespoke design and build, Armored Doors utilizes state of the art technology and years of engineering experience to bring your unique design to life.

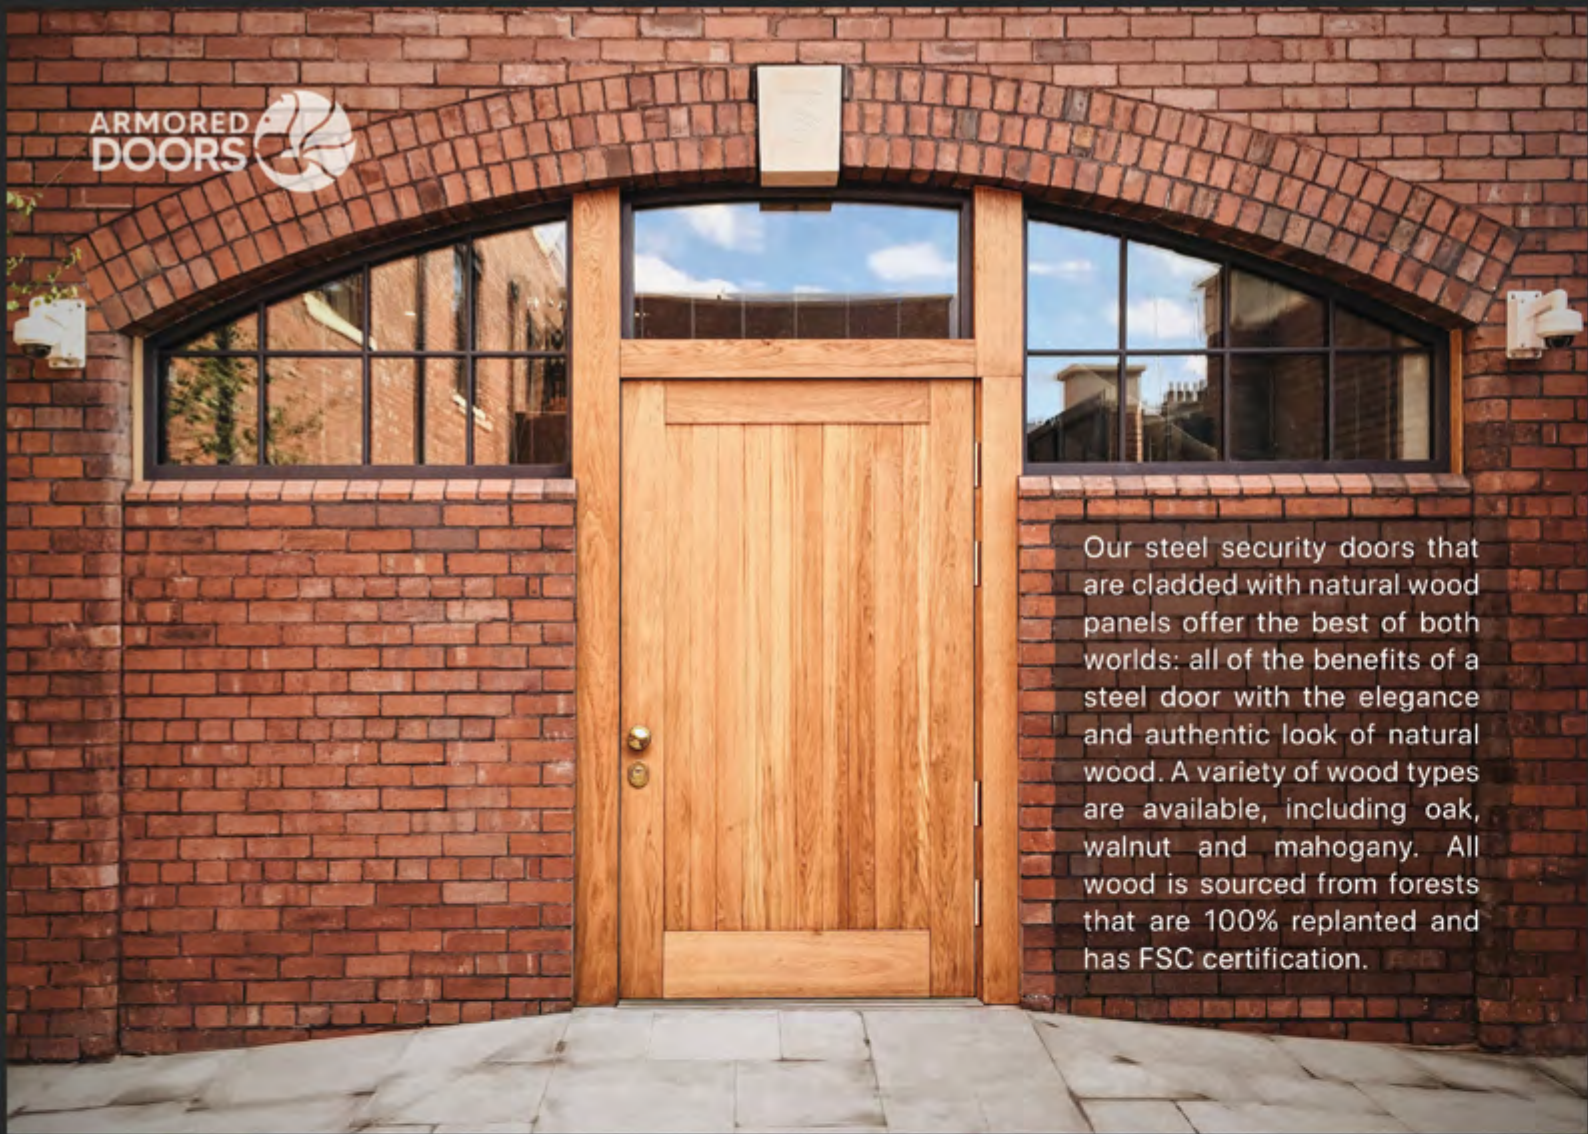

We take pride in every custom exterior security door we produce, using only the highest quality materials such as galvanized solid steel and engineered wood panels. Choose panels of glass to allow natural light into your home, then add sleek hardware to complement your home's aesthetic. With a variety of color options to choose from, you will be certain to find a door that is perfect for your space.

Glazed armored doors brighten a room and transform a space, filling it with natural light. Our glazed security doors feature a wide range of burglary and bullet resistant glass options, giving you the security you require without compromising on beauty and design.

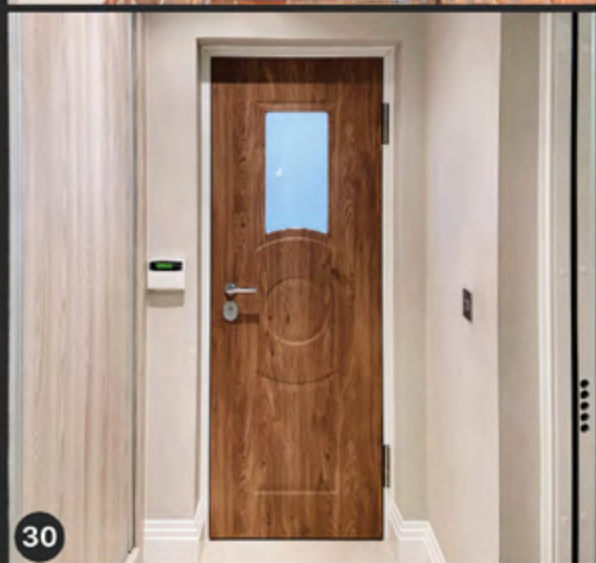

Our unique patio doors are built for security and energy efficiency while also adding style and beauty to any home. Our French patio doors can open into a room or onto an outdoor patio, making a dramatic statement and adding welcomed ventilation to any space.

While it may not be the focal point of your house, choosing a side or back entrance door matters. Your side or back security door is crucial in securing all points of entry into your home, reducing vulnerability and ensuring the safety of you and your family.

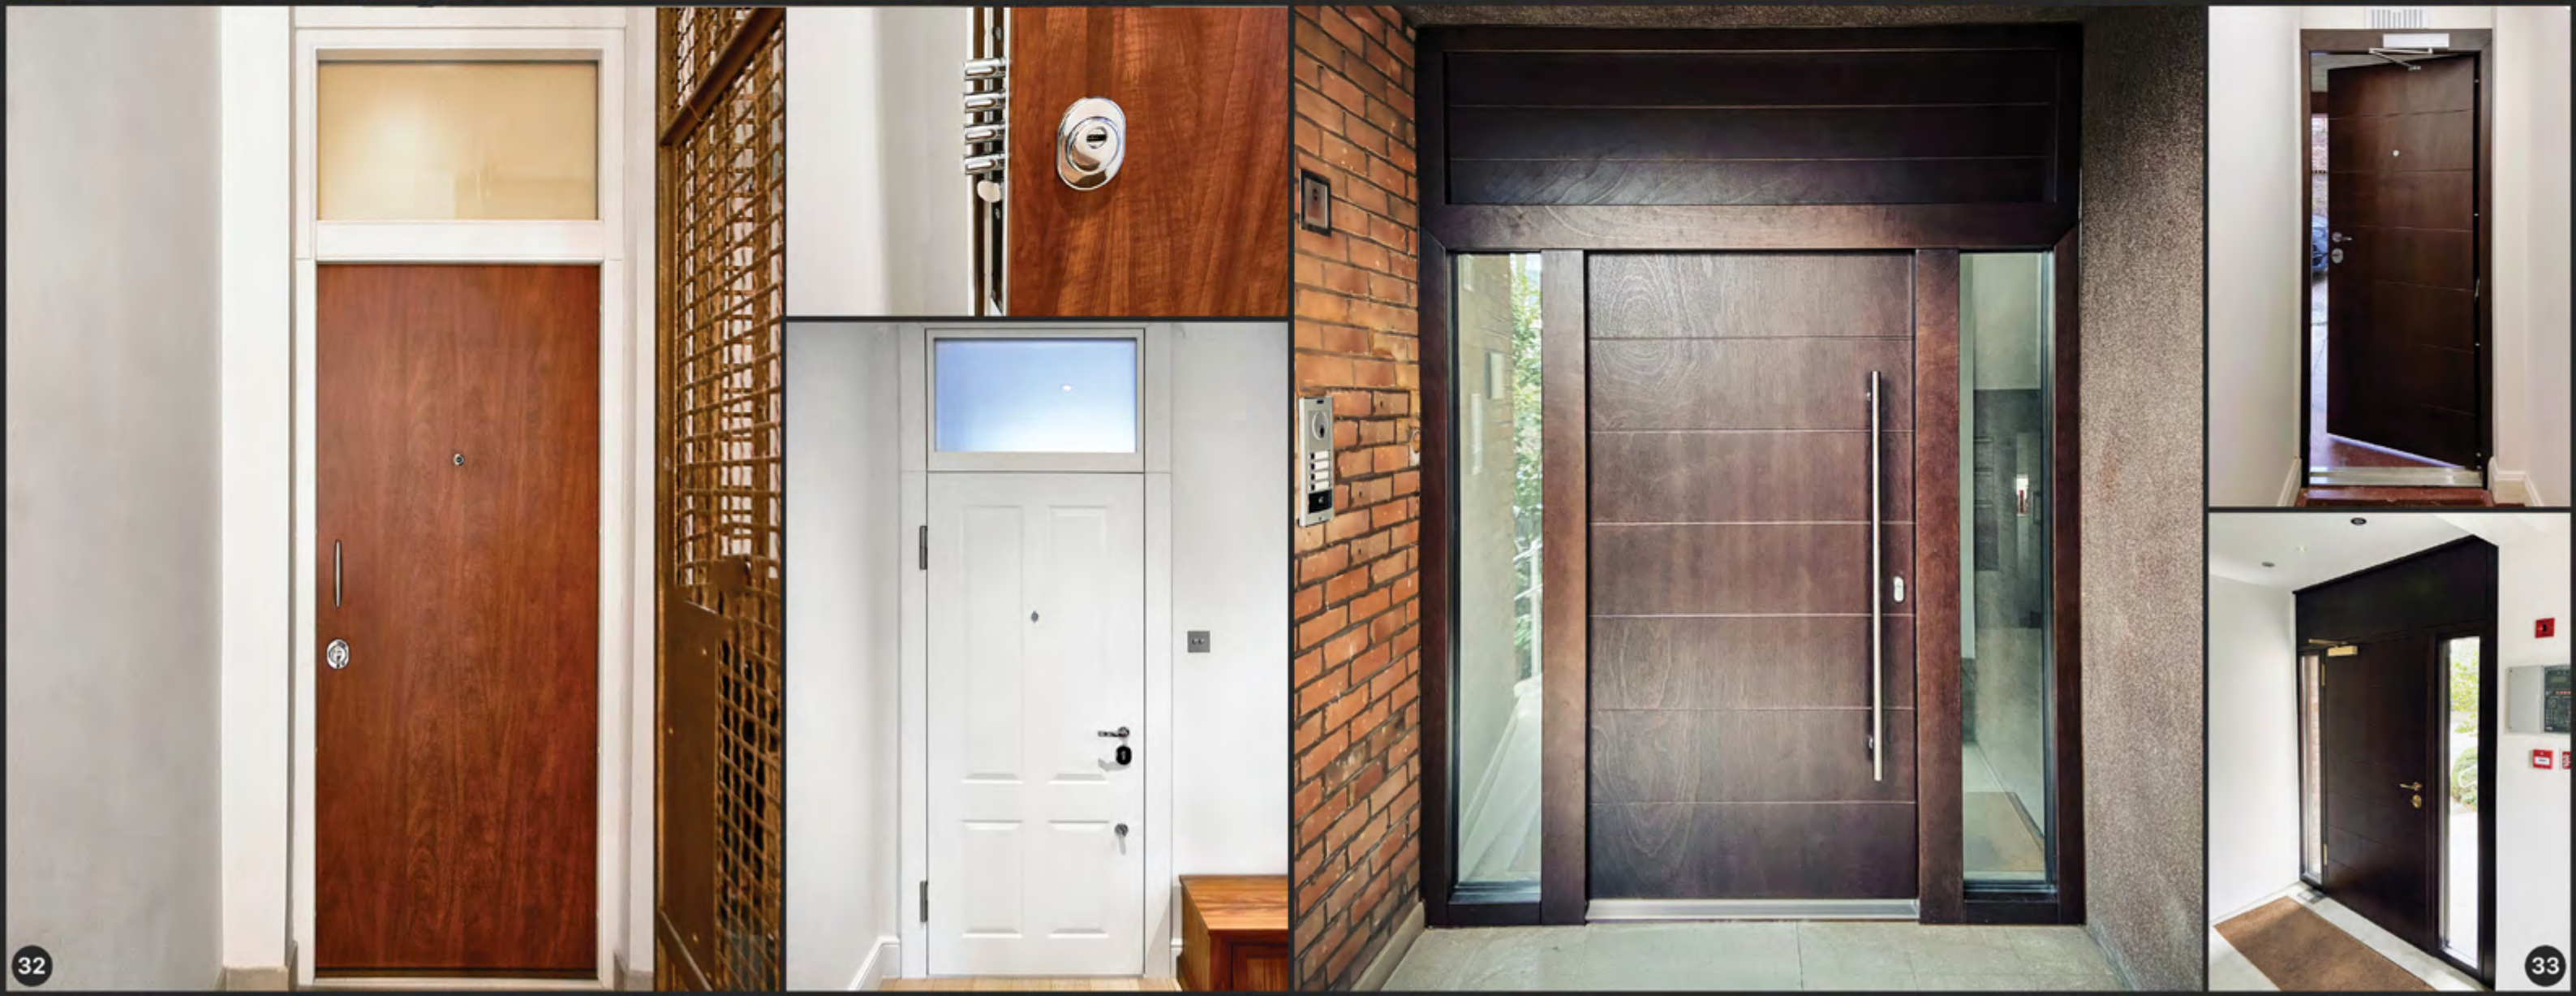

Our internal security doors can be used on their own, installed in a concrete wall or at the entrance to a safe room. These internal doors can be designed to match all other internal doors, so they blend seamlessly into the existing environment.

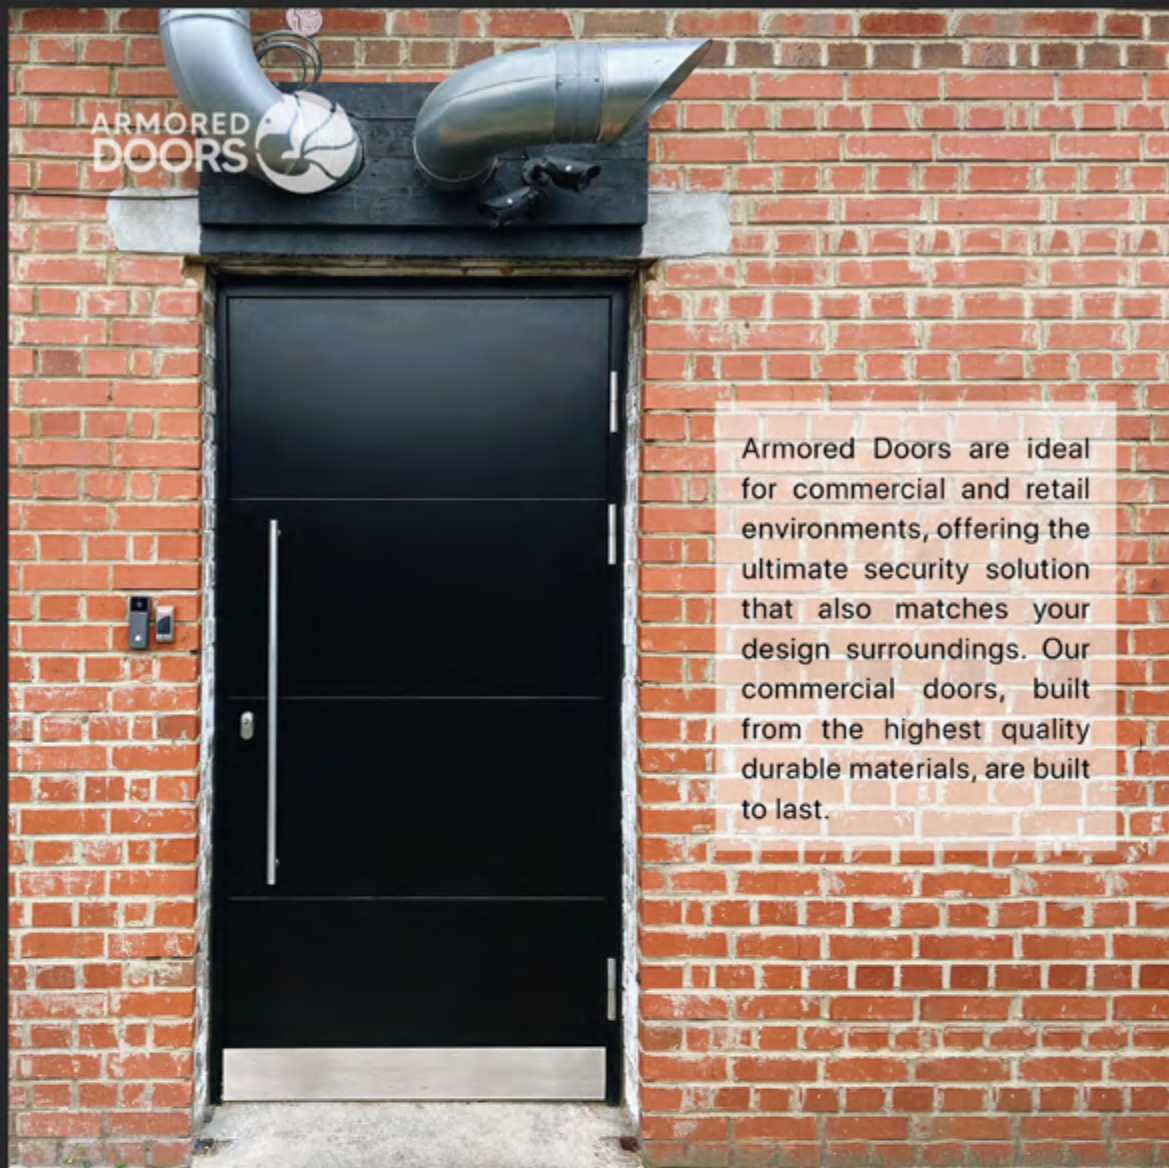

Armored Doors is able to supply apartment doors of any style, height or design, giving tenants and landlords maximum peace of mind. Our superior crafts designed to be identical to the style you require, whether your door is a replica or a bespoke design. Our apartment doors offer a variety of advanced locking systems and security grades that meet international standards.

Our lobby doors utilize only the highest quality, durable materials, creating a secure entrance to any office, workspace or residential apartment complex. A variety of luxurious finishes and designs are available, custom designed and delivered to you. Whether you are looking for a traditional style or something more contemporary, you will be protected at all times with a safe and beautiful Armored lobby door.

Step 1: Select your door shape

Step 2: Select your door design

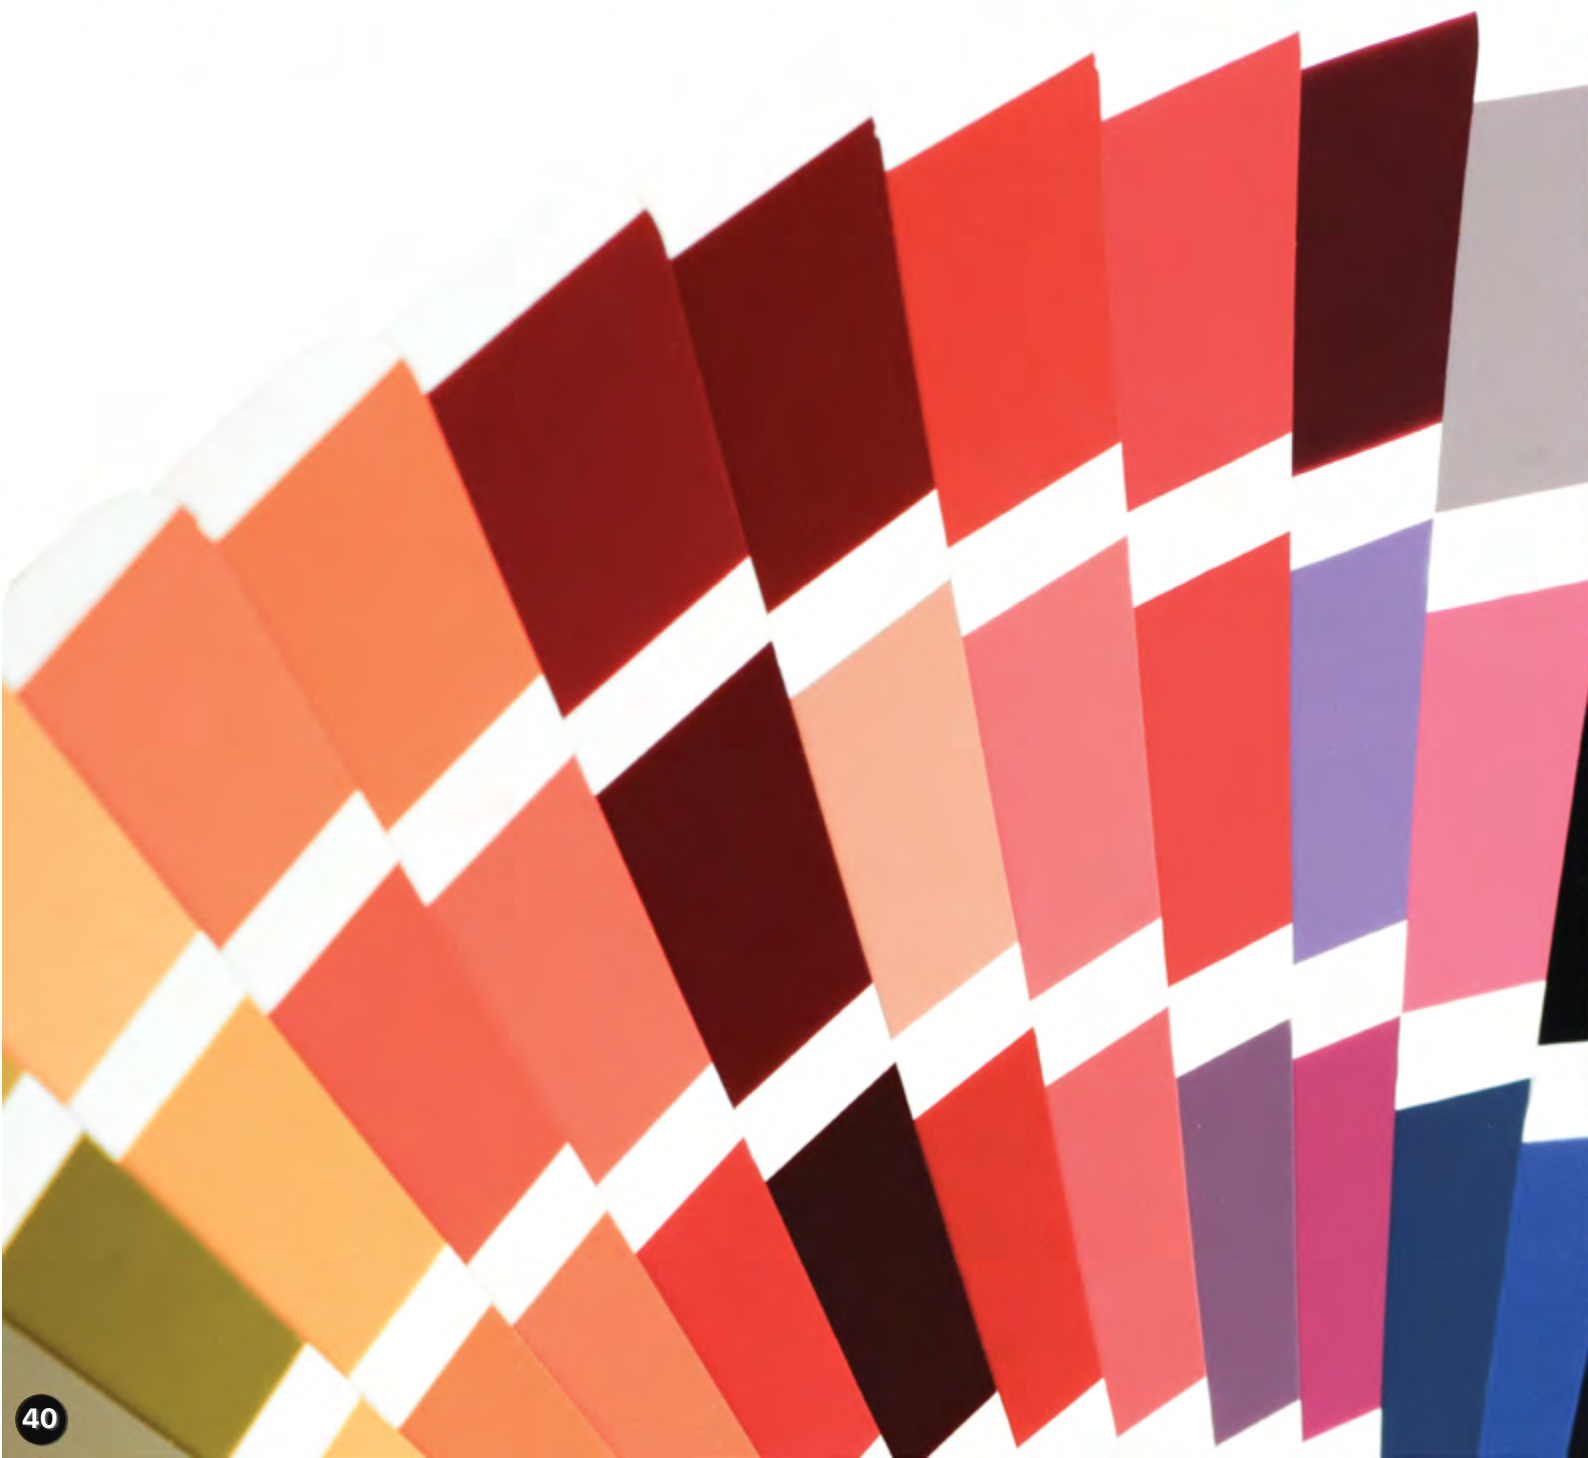

Alternatively, we can replicate any door design or create a new custom design that perfectly matches your exact specifications

Step 3: Select your door color

Our doors can be painted in any RAL color, you can choose any desired color for inside and outside doors to create the perfect door.

For the complete list of colors press [here](#).

In addition, a variety of wood-type finishes are available, including oak, cherry, walnut, and mahogany.

If you are looking for cutting edge technology, Armored Doors offers the electromechanical smart multipoint lock: the FIAM xR1 SMART. This lock is easily programmed and controlled using Argo, a smartphone app available for both iOS and Android. Through the Argo app, door access permissions are added, deleted and modified using a smartphone, Apple Watch Series 3 and Series 4, ISEO cards, pre-existing RFID cards such as contactless credit cards, PIN codes, fingerprint scanners and intercoms. You are also able to easily connect to home automation systems.

The x1R SMART is an electromechanical lock designed specifically for Armored Doors. Opening and closing functions are controlled by a motor, however, the bolt can be operated mechanically using a traditional key in the event of a power outage.

From the front door to internal safe room door, and to the alarm system: thanks to E-key home, your finger is the key – simple, convenient, secure!

E-key home consist of a finger scanner mounted outside the area to be secured, and of a control panel, which allows user administration, such as enrolling or deleting users, mounted within the secured area. No computer is necessary for programming and operation. Up to 99 fingers may be saved.

Custom Security Windows

Along with our extensive range of security doors, we design and manufacture custom-tailored steel security windows for residential and commercial properties. We offer the broadest range of security windows available in the market today, from historical replicas to modern designs. Specify a single or double-hung sash, or casement window, Armored Doors has got you covered. Steel windows feature the design benefits of a wooden window plus the many benefits of a steel window which include burglary and bullet resistance, noise reduction, thermal, water, and wind insulation.

These unique high-security windows can be modified to meet the precise requirements of your project, in terms of size, shape, or security grade. Every window we produce is integrated with a multi-point locking system and it has the same heavy-duty steel frame as our doors, giving you the security you require without compromising on beauty and design.

Custom Safe Rooms

A safe room; or panic room is a reinforced room installed in a private residence or business to provide a safe shelter, or hiding place, for the inhabitants in the event of a break-in, home invasion, terror attack, or other threat.

Cost-effective and highly efficient, our panic room panels can be retrofitted into any home or commercial property to provide a high level of protection and security, virtually any room can become a safe haven from intruders.

We offer a variety of security grades that will provide protection from forced entry and firearm- related attacks. Whether it is sharp weapons such as axes, sledgehammers, crowbars, battering rams, or firearms such as handguns, machineguns and assault rifles Armored Doors ensures that you and your family are protected at all times.

Armored Doors ships security products to individual and trade customers wherever they need them in the world thanks to our factory convenient European location. We work meticulously to explore each country's laws, regulations, and policies to ensure that everything runs efficiently. We work with various local freight companies and provide you with a range of freight options to choose from.
