PICKUP  
RESERVED FOR CURBSIDE

# NATIONWIDE ROLLOUT PROJECTS?

## GPRS IS HERE TO HELP.

### CURBSIDE PICKUPS AND DRIVE-THROUGH EXPANSIONS

As grocers and other retailers expand their capabilities as it relates to curbside pick-up, more stations, signs, and pedestals must be placed along curbs and in parking lots. Without a private utility locate during the installation process, there's a risk of underground utility strikes ■

### TENANT IMPROVEMENT AND MAINTENANCE

With the rise of e-commerce in the in the ever-changing retail space, contractors and owners are tasked with the re-purposing of vacant box stores and offices in strip malls. GPRS can provide critical information regarding the subsurface such as location of utilities, reinforcements, and USTs ■

### NEW CONSTRUCTION RETAIL ROLLOUTS

When relocating cash wraps, launching new products, and remodeling a store, the need to cut or core concrete slabs presents a safety risk. Saw cutting and coring into an electrical conduit not only presents risk for the operator and nearby workers, but also risks shutting down the site or nearby sites ■

### EFFICIENCY UPGRADES

With customer service being a central focus for retailers and restaurants upgrades are often made to increase efficiency and reduce wait time. When adding canopies, drive-through lanes, or self checkout kiosks, excavation must occur. A comprehensive private utility locate is a must in order to mitigate risk ■

## TOP RETAIL CLIENTS INCLUDE:

## SERVICES

### UTILITY LOCATING

Our utility locating services designate the horizontal and vertical position of buried utility lines and other infrastructure on public and private property.

### VIDEO PIPE INSPECTION

CCTV inspections give detailed pipe location and condition information. Our reports detail each pipe by segment.

### LEAK DETECTION

Routine water loss surveys and leak detection complement our locating services to reduce instances of non-revenue water.

### CONCRETE IMAGING

Our technologies are able to scan large areas and compile a detailed drawing or sketch that shows the safest path for future penetrations.

### 3D LASER SCANNING

Provide your team with precise as-built data and models for reliable project planning to reduce the risk of change orders and project delays.

### MAPPING & MODELING

Our Deliverables Team can create satellite image overlays, 3D models, CAD drawings, and even aerial drone imagery.
