RealPTT Dispatcher - Desktop and Mobile App for Location and Communications Management

COMMUNICATE, COORDINATE, AND FACILITATE ON DESKTOP OR MOBILE.

Communicate instantly and efficiently with nationwide groups of remote users using RadioManUSA RMP-700 and RMM-750 Push-to-Talk over Cellular (PoC) radios.

Coordinate user locations and jobs with GPS tracking and geofencing.

Facilitate cost reductions by keeping your team connected and working together at the push of a button.

RealPTT Dispatcher is a desktop- or mobile-based communication and location dispatch application with instant nationwide group calling and real-time GPS location tracking.

GPS LOCATION TRACKING AND GEOFENCING

RealPTT Dispatcher can track multiple user locations and travel routes with time stamps to manage and dispatch remote users. Dispatchers can draw geofences on the map to define boundaries for territories and service areas. Alarms can be generated when users enter or leave geofenced areas.

INSTANT NATIONWIDE GROUP CALLING

RealPTT Dispatcher provides nationwide group calling from one or more dispatchers with pre-programmed or dynamic call groups. Quickly build dynamic groups with a simple list selection or by selecting an area on the map.

KEY FEATURES AND HIGHLIGHTS

GROUP AND INDIVIDUAL CALLING
RealPTT supports nationwide Push-to-Talk group and individual calling.

GPS LOCATION TRACKING
Enables tracking of driver locations and travel routes with time stamps.

DESKTOP OR MOBILE APP
Use RealPTT Dispatcher on a Windows PC or on an Apple iOS or Android phone or tablet.

TEXT MESSAGING
Dispatch can communicate with users via text message to their radios.

REMOTE STUN AND REVIVE
RealPTT Dispatcher can stun (disable) and revive (turn on) remote radios that are lost, stolen, or used maliciously.

SOS ALARM
Click or tap on an SOS alarm activated by a user in the field to see their current location on the map and respond.

GEOFENCING
Draw geofence boundaries for individuals or groups of remote users, and receive alarms when users enter or leave geofence areas.

SAFETY FEATURES
Supports sending and receiving Emergency Alarms for enhanced worker safety. Dispatcher can perform Lone Worker monitoring, and remotely monitor audio during emergency situations.

CALL LOGS AND RECORDING
Features full call recording, logging, and playback.
