SECTION 2.0: GSA LABOR CATEGORY DESCRIPTIONS

Systems Architect II

Experience: 8 Years of relevant experience

Education: Bachelors or equivalent in a related field

Qualifications: Ability to establish system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Design architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces.

Functional Responsibility:

- Ability to establish system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems.
- Design architecture to include the software, hardware, and communications to support and maintain the total requirements as well as provide for present and future cross-functional requirements and interfaces.
- Ensure these systems are compatible and in compliance with the standards for open systems architectures, the OSI and ISO reference models, and profiles of standards such as IEEE OSE reference model as they apply to the implementation and specification of information management solution of the application platform, across the API, and the external environment/software application
- Support the understanding of business and data requirements, strategic and organizational planning through Business Process Improvement, and design visualizations for initial concepts and prototypes that can be presented for feedback
- Ensure that the common operating environment is compliant with the Agency enterprise architecture and applicable reference models.
- Evaluate analytically and systematically problems of workflows, organization, and planning and develop appropriate corrective action. Provide daily supervision and direction to staff.

Senior Business Intelligence (BI) Classroom Trainer and Training Developer

Experience: 4 Years of relevant experience

Education: Bachelors or equivalent in a related field

Qualifications: An experienced technical trainer with extensive Organization Performance Management knowledge. Must be comfortable working with a broad audience and adhering to the learning needs of everyone in the classroom whether the trainee is attending live or virtually. The trainer is responsible for explaining the functionality of BI software and teaching class attendees how to use the software efficiently. Trainer will help each attendee gain a basic knowledge of the software while also discussing advanced features. The Senior BI Trainer will lead the generation of new training content and updating existing content via training manuals, documentation, and training videos.

Functional Responsibility:

- Deliver in-person or live-online training classes. Prepare, augment and enhance in-house training content. Manage class logistics which may include porting training

material and systems. Excellent Facilitation and Presentation skills. Ability to translate knowledge into skills. Impeccable English communication. Content Development skills.
