THE DEVIL'S IN THE DETAIL

With over 25 years of experience delivering pools and wellness facilities, HTP Group pride our ability to manage your pool project from conception to completion. We work hand in hand with many architects and specifiers to ensure the detail is of high quality and exacting standards. Our expertise and skilled team will ensure your pool installation project is of unrivalled consistency and high quality.

INDOOR POOLS

HTP Group provide a full specialist package for your indoor pool & heat recovery system. We coordinate with main contractors and developers when carrying out new build and extensions, often saving money by working closely with the building trades around an indoor pool build. We can install a pool at early foundation stages, then return to site once overhead ceilings, finishes and surrounds have taken place. Automated dosing control systems, and filtration controls, enhance your indoor pool, reducing the need to "hand dose" a pool and keep maintenance to a minimum.

WHAT DREAMS ARE MADE OF

Swimming in your own pool can be a pure luxury and indulgence. HTP Group provide the highest standard of attention to detail, aftercare and support as well as design & concept planning for your back garden & home.

We pride our team in expert advice and experience, bringing a wealth of knowledge to your dream swimming pool project.

Careful planning and consideration of your needs when choosing the right pool are important and we realise that getting it right takes time and effort for your lifestyle.

OUTDOOR POOLS

Owning an outdoor pool is a lot easier than we think. With modern filtration systems, dosing controls and amazing heating options, together with thermal insulation, modern pool building is far more sustainable. We can heat your pool via solar, ground source or air source heat pumps, together with heat insulating pool covers that conserve and keep energy costs lower.

Our range of pool options can accommodate different shapes, entrance stairs, colours and finishes to match & blend into existing surroundings. Sympathetic and clean cut designs enable a futureproof finish with less maintenance than older traditional swimming pools.
