GAUSSIN announces an order from GROUPE ROBERT in Montreal in CANADA for 6 ATM® FULL ELEC vehicles

Delivery of the vehicles, the first in North America, is scheduled for the fall of 2023

GAUSSIN (ALGAU - FR0013495298), a pioneer of clean and smart freight transport, announces an order from GROUPE ROBERT for 6 ATM® FULL ELEC vehicles, for delivery in the fall of 2023. With this purchase, Groupe Robert, a provider of logistics solutions in North America and mainly in Quebec and Ontario, reinforces its position as a leader in eco-responsible innovations. The official announcement was made this Monday afternoon from the Quebec General Delegation in Paris in the presence of Michèle Boisvert, Delegate General.

A reliable and robust production vehicle

ATM® FULL ELEC has already proved its worth with more than 45 retailers in Europe and is continuing its development across the Atlantic with this new order.

Canada is thus a promising new market for GAUSSIN. The group is benefiting from the commercial spin-offs of the H2 World Tour, which crossed the North American continent last June and enabled GAUSSIN to establish contacts with GROUPE ROBERT in Montreal.

GAUSSIN's ATM® FULL ELEC for Groupe Robert's logistics activities

Then, a visit in France last September of the company's president, Michel ROBERT, was the occasion to test the vehicle and to visit the assembly line of Saint-Vallier. This exchange convinced GROUPE ROBERT that ATM® FULL ELEC was the right choice to ensure the logistic management of different sites operated by the company in Canada.

“We were convinced by the ATM technology and more generally by the GAUSSIN group during my visit to the Saint-Vallier site in September 2022. These vehicles are perfectly adapted to our needs and will allow us to optimize our supply chain management for our customers in Quebec and throughout North America,” says Michel Robert, President of Groupe Robert.

“The ATM® FULL ELEC has demonstrated its reliability and robustness in Europe since 2015. GAUSSIN has thus accompanied logistics companies in their energy transition with a fleet of more than 100 vehicles in operation to date. We are delighted to be working with Groupe Robert in Canada, which further strengthens our excellent prospects for the North American continent”, declares Christophe Gaussin, CEO of GAUSSIN.

A new order for the ATM® FULL ELEC with NMC battery.

This order is for a new version of the ATM® FULL ELEC with NMC battery with Fast Charge for an autonomy of 10h and a charging time of 1h.

This battery technology allows to operate in all climatic conditions without any special provisions. Delivery is scheduled for autumn 2023 for the 6 vehicles with commissioning and training on site by GAUSSIN teams.

Financial incentives of up to 185,000 Canadian dollars (approximately 137,000 US\$)

GAUSSIN's ATM® and APM® are now eligible for financial incentives from the Canadian authorities, which encourage the purchase and rental of vehicles that are part of a low-carbon mobility approach. This means a grant of CAD 100,000 per vehicle from Transport Canada (about US\$ 74,000) and CAD 85,000 (about US\$ 63,000) from the Quebec Ministry of Transport. For companies in the Province of Quebec, this aid can be combined for a total of 185,000 Canadian dollars (approximately 137,000 US\$) (see PR of March 23, 2023).

Next steps

Participation in French President's official trip to China: April 4-8, 2023

About GAUSSIN

GAUSSIN is an engineering company that designs, assembles and markets innovative products and services in the field of transport and logistics. Its know-how covers the transport of goods and people, autonomous technologies for driverless use such as Automotive Guided Vehicles, and the integration of all types of batteries, particularly electric and hydrogen batteries. With more than 50,000 vehicles worldwide, GAUSSIN enjoys a strong reputation in four rapidly expanding markets: port and airport terminals, logistics and people mobility. The group has signed agreements with global companies: Qatar Airways Cargo, Maersk APMT, UPS and Amazon. Each of these partners is a world leader in its sector. GAUSSIN has expanded its business model by signing licensing agreements to accelerate the distribution of its technology throughout the world. The acquisition of METALLIANCE is the culmination of the emergence of an international group present in all segments of intelligent and clean vehicles.

GAUSSIN won twice the Dubai World Challenge - Global Competition for Autonomous Transport, in 2019 and 2021.

In January 2022, GAUSSIN successfully completed the 2022 Dakar Rally with its H2 Racing Truck®, the first hydrogen vehicle to take part in the race and generate zero CO2 emissions.

In March 2022, Christophe Gaussin was named "Hydrogen Personality of the Year" during a ceremony at the French National Assembly as part of the Hydrogénies - Trophées de l'Hydrogène.

GAUSSIN is listed on Euronext Growth in Paris since 2010 (EURONEXT GROWTH - FR0013495298).
