G-H SYSTEMS INC.

Quality.

The equipment we manufacture endures the test of time. The process systems and equipment we design with our customers perform to the most rigorous standards. The relationships we build with our clients ensure operational reliability that extends far beyond the project completion.

Blower Piping and Valves.

G-O™ Single Drop Aeration

Responsiveness.

Each project is unique. Your site conditions are unique. Your process requirements are unique. We are uniquely positioned to respond quickly to your needs with customized solutions that are designed to meet your needs.

Aerobic Digester with Air Bridge & G-O™ Diffusers

Bridge Supported Clarifier

Experience.

G-H Systems has designed and manufactured water and wastewater treatment equipment since 1984. Around the U.S. and around the world, we're proud to have earned a reputation for technical excellence, professionalism and dependability. Our complement of seasoned personnel are at your service. You can rely upon G-H Systems for both our equipment designs and our process engineering expertise.

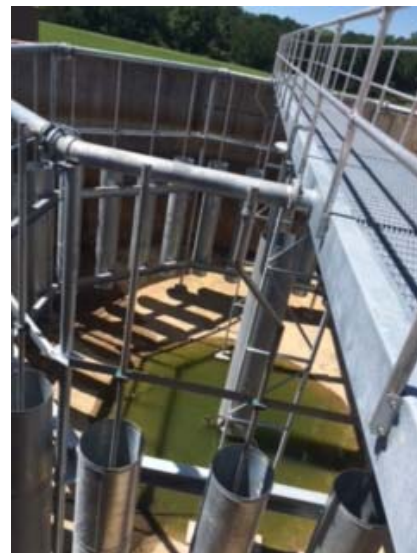

Gravity Sludge Thickener

Personal Service.

*We dedicate ourselves to the concept of personal service every day. G-H Systems delivers service the old-fashioned way: quickly, completely and directly. On **your** project, **you** are the most important person. We always remember that. We treat **you** that way.*

Center Pier Supported Hydraulic Differential Clarifier

Digester with Shear Tubes

Excellence - Always.

Be it our equipment components or our package systems, engineering, installation or project management... G-H Systems stands firmly behind our participation in every project well after its conclusion. No other company is willing to listen better, work harder, react faster or go farther to ensure the success of your project. G-H Systems is ready mobilize our personnel, our resources and our experience on behalf of your project. Our name on your project is your assurance of quality.

Aeration Systems

- Single Drop
- Aerated Grit
- Pre-aeration
- Post-Aeration
- Mixing
- Piping and Valve Systems

Clarifiers

- Circular Pier-supported
- Circular Bridge-supported
- Hydraulic Differential
- Plow / rake collectors
- Solids Contact

Aerobic Digesters

- Single drop
- Eductor tube
- Digester conversions

Weirs, Troughs & Baffles

Aerated Grit Basins

Gravity Thickeners

Wastewater Package Plants

Water Treatment Package Plants

G-H Systems provides solutions for your water and wastewater treatment needs. We engineer solutions by engineering equipment and providing processes to solve your problems.
