## SURGICAL/ANESTHETIC AND MEDICAL CONSENT FORM

### Feline Spay

The following procedures will be performed today:

**Pre-Anesthetic Testing** – Because of our commitment to providing you with the highest quality of veterinary care, we require pre-anesthesia testing. Each surgical or anesthetic procedure has some risk involved. Advances in anesthesia have made routine procedures relatively safe, but occasional problems can occur due to pre-existing conditions not evident on physical examination. If there is any indication of an abnormality, we will either contact you before proceeding or take steps necessary to ensure the safe care of your pet.

**Pre-Anesthetic Panel** - tests liver and kidney function, glucose levels, assesses hydration and protein levels, platelets for clotting, complete blood count (this testing is completed ahead of surgery)

**IV Catheterization** - for fluid therapy, IV medication or any emergency drugs if necessary

**Fluid Therapy** – intravenous fluids to maintain normal blood pressure, preserve hydration and ensure adequate blood flow to vital organs

**Anesthesia/Monitoring** – respiration, blood oxygen level, EKG, temp, CO2 levels and blood pressure

**Anesthesia** – pre medication, IV and gas anesthesia

**Surgical Procedure** – ovarian hysterectomy

**Recovery Monitoring** – including pain assessment

**Pain Medication Dispensed** – when necessary

**Hospitalization**

**Discharge Instructions**

**Total Cost: \$580.00**

---

We offer the following additional procedures at the time of surgery. Please indicate whether or not you would like to have them performed.

**Home Again (microchip) \$73.50**  Yes  No *Includes registration fee & 1 year membership.*

**Leukemia/FIV test \$99.00**  Yes  No
