Winter is the coldest season of the year, occurring after autumn, which typically brings snow! Although Miami doesn’t experience a winter season, we can try to imagine what it would be like by exploring these various sensory bins.

**Polar Shaving Cream Bin**

**Gather materials:**
- Foam Shaving Cream
- Large Bin (safe to put in freezer)
- Blue Food Coloring
- Stick
- Polar Animal Figures (like seals, polar bears, whales, penguins)
- Shovels / Tools
Squirt the foam shaving cream into your bin. Fill it up as much as you desire.

Add a few drops of blue food coloring to your shaving cream.

Swirl it around with a stick. This will give it a tie dye or marble effect.

Insert any polar and ocean animal figures, spread them around, and hide some within the foam.
Put the bin into your freezer for at least one hour or until frozen.

Take out your bin and add any tools or shovels to help dig out the cold creatures.

Pour a tiny bit of water to loosen the shaving cream and let your little ones enjoy!

Sensory Snow Bin
Pour 1/2 cup of hair conditioner into a large bowl or bin.

Gather materials:
• Large Bin
• Shovels / Cut Outs / Animal Figures
• 1/2 Cup Hair Conditioner
• 3 Cups Baking Soda
• Fork

Add 1 cup of baking soda and mix together using a fork.

Add another cup of baking soda and continue to mix.
Add the last cup and of baking soda until thoroughly mixed. *Note: Your mixture should feel soft and silky, but not sticky. It should also be moldable. Add a little more baking soda if needed.

Finally add in some fun toys to your bin. You could have digging tools, ice-loving animal figures, or even some cookie cutters to make shapes in the snow.

**PRO-TIP:**
To make a larger amount of the mixture for your bin, just use the ratio of ½ parts of hair conditioner to 3 parts of baking soda.
