- Files can be retrieved through a secure web link and will be available for one month.

\$50.00 minimum on all orders.

about our fine art papers and canvases

Somerset Velvet

A warm white "old world" paper with a little bit of texture to it, this 255gsm high opacity paper has a velvety surface for rich detail in watercolors and prints of all types.

Textured Fine Art Paper

Very stiff and heavily textured, this 310gsm eggshell-colored cold-press museum-quality paper gives excellent color depth and very rich blacks, with a flat matte surface.

Epson Hot Press Bright

An acid free, 100% cotton rag media with a bright smooth matte finish. This paper has an extremely-high color gamut and black density.

All our fine art papers are 100% cotton rag and acid-free.

**This does not include the photo papers.*

Matte Canvas

This 21-mil, high-white-point acid-free, pH-neutral matte coated canvas is a water-resistant poly/cotton blend for greater durability and ease in stretching or mounting. The smooth Oxford 2-over-1 weave is ideal for photo and art reproduction.

Satin Canvas

Somewhat creamier, with a bit more sheen, this 19-mil acid-free cotton canvas is water-resistant and resistant to cracking; it can be used with water-based fixatives for post-print embellishments. The satin finish and textured weave enhance photo and art prints that will be stretched or mounted.

All our canvas products are acid-free.

Epson Semi-matte Photo Paper

Highest color gamut available for vivid color reproduction. RC paper base for actual photo prints. Semi-matte (low gloss) surface that dries instantly for easy handling. 10 mil thickness for a durable photographic feel.

Metallic Photo Paper

Create stunning prints that previously could be output only in a darkroom. The metallic high-gloss surface on this 10-mil, 255 gms photo paper results in prints that are sharp, vibrant and exceptionally rich. A wonderful paper for photographs.

\$50.00 minimum on all orders.
