

2019 YEAR-END REPORT

StartUp Health Insights™

A quarterly report on health
innovation and the health moonshots
transforming the world.

ABOUT STARTUP HEALTH INSIGHTS™

StartUp Health collects and shares market insights because these data points tell a critical part of the health innovation story. More than simply chronicling the flow of money, this report provides a glimpse into the overall health of our health moonshots. The story beneath the top-line figures opens up new challenges as well as opportunities. Health moonshots require radical collaboration, so we encourage you to dig into this report and then bring your own insights to the table at startuphealth.com.

ABOUT STARTUP HEALTH

At StartUp Health we believe that with the right mindset, a moonshot vision, and the spirit of an entrepreneur, anything is possible. We also know that something magical happens when you bring together people who are passionate about impacting lives for the better around common goals.

That's why, since 2011, we've been investing in a global army of Health Transformers to solve the world's biggest health challenges.

Join the movement at startuphealth.com.

2019: The Year in Health Innovation Funding

2019 continued the strong upward trend in health innovation funding that we've been tracking for most of a decade. With \$13.7B in total funding across 727 deals, 2019 was the second most-funded year ever, and we see the trend continuing.

We've called 2019 "The Year of the Patient" because of the dramatic funding of "patient empowerment" tools like Bright Health and Capsule, but that wasn't all that caught our attention at the end of the decade. Access to Care dominated health moonshot funding, particularly outside of the U.S., including mega-deals for Babylon Health, a consumer-focused health service provider that enables remote medical consultations, and Tencent Trusted Doctor, an online healthcare services platform. These two deals alone amounted to \$800 million.

The Women's Health Moonshot has made much needed progress this year. In Q4 2019, it drew in over \$85 million in funding for an annual total of \$425M,

including raises for The Pill Club (\$51M), which lets women order and ship birth control to their front door, Elvie (\$42M), a femtech hardware company, and Gennev (\$4M), a StartUp Health company which helps women manage menopause.

On the other end of the scale this year's funding showed us where we need renewed investment and innovation. The Addiction and Children's Health Moonshots had a poor showing, with \$96M and \$118M in funding respectively. In fact, none of the year's top investors invested in addiction innovations. Education and content was the least-funded function with only \$120M.

But where there are gaps in the market, whether in the type of investment or to what region that money is directed, we also see opportunity. We'll be watching for new entrants and bold investors willing to tackle the great crises of our time, in new ways, and from new hubs of innovation around the globe.

INVESTMENT SPECTRUM

Every company in the StartUp Health Insights database is sorted into one of 10 functions – its main value drivers. This top line break-down offers a look into the breadth of investment, which speaks to the overall health of the market (shown here), and each health moonshot, which we'll share in coming pages.

FUNCTION	2019
Wellness	\$1.7B
Research	\$1.5B
Patient Empowerment	\$2.7B
Biometric Data Acquisition	\$864.4M
Administrative Workflow	\$1.1B
Clinical Workflow	\$1.9B
Personalized Health	\$1.2B
Population Health	\$1.3B
Insurance	\$1.1B
Education + Content	\$120.4M

▲ THE STORY

We called 2019 "The Year of the Patient" because of funding for "patient empowerment" tools, but there were other trends of note. An influx of capital in support of clinical workflow and administrative workflow (a combined \$3B) translated to important investment in health infrastructure. Investment in wellness companies continues to expand the scope of health while education remains at the bottom of the tally, in need of investment attention.

\$70B Raised in Health Innovation Since 2010

Health innovation funding continued its strong upward trend, a curve we've been tracking for almost a decade. While you can parse each rise and dip in our quarterly insights report, these year-over-year numbers tell a simple yet compelling story – health innovation is robust and growing. In a mere decade, 4,300 startups got funded, and funding levels increased by a factor of 10, with similar growth in the number of investors. And from our vantage point, we're just getting started.

Health Innovation Funding, Year Over Year

● Deal Count

Source: StartUp Health Insights | startuphealth.com/insights. Note: Report based on publicly available data through 12/31/19 on seed (incl. accelerator), venture, corporate venture, and private equity funding only. Companies tracked in StartUp Health Insights may fall under multiple moonshots and therefore will be represented throughout the report.

A Surge in the East

Boasting three out of 2019's top 10 most-funded cities, China cemented its place as a hub for health innovation, and is positioned for continued growth. When it comes to total deals, London topped the charts, while Paris and Tel Aviv posted significant gains over 2018. It's noteworthy that no city in South America or Africa has yet made the list, though innovation in the southern continents abounds. It's time for investors to broaden their field of vision.

Most-Funded Non-U.S. Hubs

	City/Region	Funds Raised	2019 Deals	2018 Deals
01	Beijing	\$855.4M	12	20
02	London	\$777.6M	27	20
03	Paris	\$456.0M	13	7
04	Mumbai	\$281.5M	7	7

Coasts with the Most

San Francisco, New York and Boston showed no signs of diminishing as juggernauts of health innovation. Looking at the 2019's top deals (10 over \$100M) it's clear that mega deals are becoming the new normal. Multiple cities showed signs of increased activity. Chicago, Salt Lake City, Seattle and Denver all showed significant increases in deal count over 2018. With only five non-coastal cities represented on this list, and none south of the Mason Dixon line, we see major opportunities for finding innovation in untapped markets.

Most-Funded U.S. Cities

	City/Region	Funds Raised	2019 Deals	2018 Deals
01	San Francisco	\$3.1B	126	139
02	New York City	\$1.5B	78	99

Most-Active Investors

We've come a long way in the last decade when it comes to the depth and breadth of health innovation investors. In 2010 we took roll and counted 168 investors in the market. In 2019 that number hit 1,344. At StartUp Health we're proud to have such a diverse portfolio, but we're not alone. Investors like F-Prime, Khosla, Y Combinator and GV all spread their funds across five or more health moonshots. This particular view of the market also let's us see the gaps in activity, making it clear that it's time to marshal resources around the moonshot to end addiction and the opioid epidemic.

	2019 Total Deals	2018 Total Deals	Access to Care	Cost to Zero	Cure Disease	Cancer	Women's Health	Children's Health	Nutrition & Fitness	Brain Health	Mental Health & Happiness	Longevity	Addiction
1. StartUp Health	17	9											
2. Y Combinator	12	7											
3. F-Prime Capital	11	11											
3. Khosla Ventures	11	14											
5. GV (fka Google Ventures)	10	6											
5. Maverick Capital (Maverick Ventures)	10	4											
7. Optum Ventures	8	4											
7. Felicis Ventures	8	-											
7. Echo Health Ventures	8	6											
10. Founders Fund	7	11											

Funding Trends Spark Calls for Innovation

At StartUp Health, we slice health innovation funding data differently than anyone else. We categorize every deal by the health moonshots – the audacious goals – that the founders and companies are striving to achieve. What we found in 2019 was continued robust funding into the foundational health moonshots of opening access and lowering costs. We were pleased to see particularly strong investment into women's health and addiction, which had the highest year-over-year growth in funding and deal count. We hope entrepreneurs and investors alike will see the gaps in funding in addiction and children's health as a clarion call for renewed innovation.

2019 Funding by Health Moonshot

● Deal Count

Source: StartUp Health Insights | startuphealth.com/insights. Note: Report based on publicly available data through 12/31/19 on seed (incl. accelerator), venture, corporate venture, and private equity funding only. Companies tracked in StartUp Health Insights may fall under multiple moonshots and therefore will be represented throughout the report.

Access to Care

2019 YEAR-END

Mega deals in global markets proved that access to care is a top global health concern. With a billion in total funding in 2019 (up 14% over 2018), access will remain a leading driver for innovation in 2020.

**Raises without a publicly disclosed dollar amount are counted in the total number of deals, but not represented in frequency of deal size analysis.

Mental Health & Happiness

For two years we've seen consistent deal flow, averaging 17 deals a quarter. But this health moonshot is still young – in 2019, 27 of the deals we tracked were Seed or Series A and 25 were under \$5M.

Addiction

2019 YEAR-END

While still our youngest and least funded health moonshot, Addiction showed signs of life in 2019. We tracked strong year over year growth in total funding and deal count, thanks in part to a \$64M raise by Pear Therapeutics.

The StartUp Health Portfolio

ACQUIRED COMPANIES

Methodologies

Sectors

We have a broad view of health innovation and believe that the current trend is a cross-pollination of technology and data with all aspects of health and healthcare. StartUp Health Insights™ tracks companies that enable health, wellness, and the delivery of care through data/analytics, sensors, mobile, internet-of-things, 3D printing, genomics, and personalized medicine.

StartUp Health tracks companies based on their health moonshot, function, applications, specialties, technology types, and end users. Investments in each of these tags are not mutually exclusive, as deals are tagged with multiple moonshots, applications, specialties, end users, and technology types, based on the company's focus.

These categorizations fall into the StartUp Health Moonshot ID to help define each company:

To achieve the MOONSHOT in SPECIALTY, COMPANY provides END USER with a FUNCTION TECHNOLOGY for APPLICATIONS.

Stage of Funding

StartUp Health Insights records only publicly-available data on cash for equity investments as the cash is actu-

ally received by the company. StartUp Health Insights is inclusive of accelerator, pre-seed, seed, venture, corporate venture, and private equity funding.

Early stage: The company has raised a Seed or Series A round

Mid stage: The company has raised a Series B or Series C round

Late stage: The company has raised a Series D or other growth equity round

StartUp Health also tracks accelerator rounds and other financings into privately-held entities (e.g. "unnamed" venture rounds, strategic investments, growth equity, and private equity).

In tabulating deal activity by stage we excluded rounds not clearly associated with a specific stage.

Sources

Funding data is from StartUp Health Insights, the most comprehensive funding database for digital health, and managed by the StartUp Health team. Information, data, and figures represent only publicly-available data.

Data for acquisitions slide was provided by a range of sources including StartUp Health Insights, CrunchBase, Angel-

List, Start-Up Nation Central Finder, and news reports.

StartUp Health works to ensure that the information contained in the StartUp Health Insights Report has been obtained from reliable sources. However, StartUp Health cannot warrant the ultimate validity of the data obtained in this manner. All data is subject to verification with the venture capital firms and/or the investee companies. Results are updated periodically. Therefore, all data is subject to change at any time.

If you find an error please let us know so we can correct it.

This report is provided for informational purposes and was prepared in good faith on the basis of public information available at the time of publication without independent verification. StartUp Health does not guarantee or warrant the reliability or completeness of the data nor its usefulness in achieving any particular purposes.
