WELCOME TO UPA

We can cover all your hire needs no matter the task or location.

With UK-wide coverage plus a huge range of top-spec equipment and service to match, you can count on UPA.

With one point of contact and expert support to guide you through the whole hire process experience, we are truly up to the task.

Wraparound support for your needs, including:

- > Advice and information
- > Site surveys
- > Training
- > Machine sales and servicing
- > Site set ups

UPA

UNITED POWERED ACCESS

OUR FLEET

With continuously high levels of investment, our comprehensive fleet is at the forefront of innovation, safety, and efficiency, ensuring you can select the optimum machine for your requirement.

We offer a full range of MEWPs for hire comprising of electric and diesel scissor lifts, hybrid, electric and diesel boom lifts, vertical mast lifts, push around vertical lifts and forklifts.

IPAF RENTAL+

In December 2021, UPA proudly gained IPAF Rental+ status, achieving silver standard on our first ever audit.

IPAF Rental+ is an accreditation from the International Powered Access Federation (IPAF) which provides assurance to customers at every stage of the MEWP (Mobile Elevating Work Platform) hire process.

The IPAF Rental+ certification ensures all powered access platforms meet the highest safety standards. You can be confident that we have access to the relevant technical guidance, industry standards, best practice, and governance within the powered access industry.

You can rest assured that our employees are trained the highest level and have the required knowledge and experience to assist you every step of the way.

SERVICE & MAINTENANCE

Before reaching you the customer, all UPA machines receive a pre-delivery inspection prior to leaving our depot.

Every machine we hire carries LOLER certification. LOLER examinations are carried out every six months by our LOLER approved engineers with complete documentation for all our fleet items available to view and download from our website **www.upa-uk.com**, or by scanning the QR code on any machine.

DELIVERY & COLLECTION

In addition to delivering nationally for our entire range of machines, our rapid response delivery and collection service covers a 70-mile radius of our central Lymm depot. For selected machines we can ensure that, from order to delivery to site, we supply your machine within just 4 hours.

As well as longer range HGV transport, our fleet of pickups with bespoke trailers, offer a low cost, more environmentally friendly transport solution.

DAMAGE WAIVER

UPA operates a waiver scheme to safeguard our customers hiring access equipment without having to worry about unforeseen costs.

Unintended incidents can occur even in the most controlled and well-managed working environments. These can leave hire customers responsible for paying the cost of repairing damage to equipment, or even replacing it.

What's covered?

Any accidental damage costs, repair costs or total loss to your machine (except the exclusions listed below), above £500.00 worth of costs, when using trained operators, who have completed their daily checks on the machine and have stored the machine in a safe location when not in use. You are liable to pay the first £500.00 of any damage, repair, or loss costs and UPA will take care of any costs above £500.00.

The following exclusions apply to UPA damage waiver:

- > Any claims from third parties
- > Gross negligence
- > Use of the machine by non-qualified operatives

- > Any damage caused by not correctly completing the operators daily checks
- > Any paint spillages or overspray presented on the machine
- > Any damage occurring because of the machine not being kept in a secure location when not in use
- > Any damage caused by using the machine in any way which is not in accordance with the manufacturer's safety parameters
- > Any damage because of hot works
- > Any corrosion or damage from chemicals
- > Any wilful damage
- > Damage caused when transporting under any circumstances other than under the machines own power
- > Any loss claims where a crime reference number is not obtained and provided to UPA
- > Using the machine on a public highway

TRAINING

Conveniently located at Lymm Service Station just off the M6 J20 and M56 J9, we are easily accessible from the North-West.

UPA offer a range of nationally recognised training courses through our fully accredited and experienced training providers to equip you and your team with the knowledge and skills to work safely at height.

We can arrange the following courses at our head office in Lymm or, if required, at various locations nationwide.

Licences

- > PAV (Push Around Vehicle) Licence
- > Combined Mobile Scissor and Boom Licence
- > Static Boom Licence
- > Forklift Truck Licence

Management

- > MEWP Management Courses

Equipment

- > Harness Training
- > Load and Unload
- > Abrasive Wheels

Health & Safety

- > First Aid

We can also arrange bespoke courses to suit your specific requirements.

HARNES KIT

General purpose, single point harness supplied with a fall arrest lanyard to provide simple and effective fall protection for total safety compliance.

- > Rear "D" ring attachment point
- > Quick connect Ezee-Klick buckles
- > High comfort webbing
- > Adjustable straps - shoulder/chest/thigh
- > Complies to BS EN 361:2002

Suitable for:

- > General tradesmen
- > Construction workers
- > Roofing
- > Vertical climbing
- > Access equipment

SCISSOR LIFTS

Providing access from 8m up to 21m, our wide range of scissor lifts offer versatile access both indoors and outdoors, with electric, bi-fuel, hybrid, gas, and diesel options available.

We have options such as non-marking tyres, power to platform and some even come with a USB charger on board.

PUSH AROUNDS

Low-level platforms deliver compact access and are a safe alternative to ladders and towers for a variety of industry uses, with a narrow footprint and tight turning circles.

Our push rounds are built with intelligent safety and monitoring, bringing the technology of large, high-level scissor lifts to a convenient, low-level solution.
