

**Anti-Snow LED SNOWPLOW and TRUCK replacement headlight**  
**SPECIAL DESIGNED FOR SNOWPLOWS & COLD WEATHER CONDITION WORK TRUCK**

Special patented design snow melt and anti-ice system work light for snowplow and other working truck operating under cold weather condition. Electrical power unique heated temp glass lens melt now and ice during the operation.

**Specification:**

Sealed temp glass lens, aluminum base, water resistant IP 66, Standard mount bracket.

Operating voltage:12V-24VDC

Operating temperature -40F°—185F° (-40C°- 85C°)

Replacement headlight for snowplow, other working truck, construction vehicle and agricultural tractor.

**Specification:**

Sealed UV Polyester PC lens, aluminum base, water resistant IP 66, Standard mount bracket.

Operating voltage:12V-24VDC

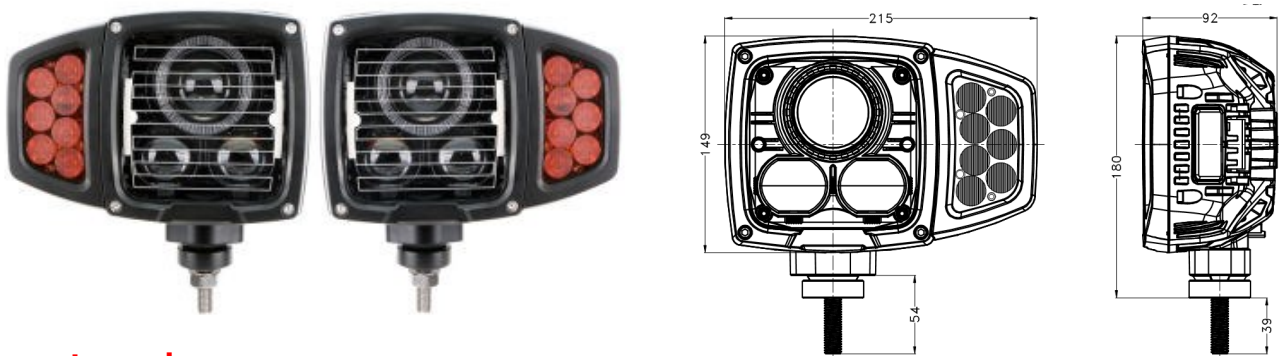

Operating temperature -40F°—185F° (-40C°- 85C°)

## Order part number

**W1006510:**

**DOT SAE** standard compliant 6" snow melt and anti-ice system snowplow headlight with high & low beam, turn signal, position light, temp glass lens. Over/under voltage protection design, 127 Watts consumption. Total 10160 lumen output. Color temperature 5500K white. built-in female terminal for Deutsch Square 5-6 multi pin connector or hardwire. Package as pair per set. ECE R112 R10 R87 R6 DOT FMVSS 571-108 approved.

## Order part number

**W1010510:**

**DOT SAE** standard compliant 6" headlight with high & low beam, turn signal, position replacement head light. UV polyester coated PC lens, 12VDC-24VDC, 104 Watts consumption and total 10200 lumen output. Color temperature 5500K white. built-in female terminal for Deutsch Square 5-6 multi pin connector or hardwire. Package as pair per set. ECE R112 R10 R87 R6 DOT FMVSS 571-108 approved.
