Introducing QliqCHAT

HIPAA-Compliant Healthcare Communication Platform

QliqCHAT Secure Texting provides a real-time, secure, HIPAA-compliant healthcare communication platform that connects every care team member and facilitates effective, patient-focused collaboration. We’re securely bridging the communication and collaboration gap between doctors, nurses, patients, and even caregivers.

More Than Just Texting

- Seamlessly navigate between secure texting, voice, and video calls
- Capture and share images, video, and audio
- Capture consent signatures
- Communicate with external groups

Industry Leading Security

Cloud Pass-Thru
Storing messages and PHI on YOUR server significantly lowers security risk.

Third-Party Integration
Integration with third party platforms using HL7, FHIR, REST APIs and JSON data.

Advanced Encryption
Peer to Peer RSA 2048 bit and AES 256 bit encryption; SOC 2 Type 2 Certified

Implementation is fast and easy!

- Quick, three-step integration through QliqDIRECT
- Bulk import of users and existing credentials for ease of roll-out
- Easily assign users and departments to groups
- Set up initial set of Quick Messages
- Intuitive workflow with embedded user guide
