Solution Delivering  
Substantial Cost and  
Time Savings with Built in  
Compliance and Controls.**

**CORPORATION  
USE CASE**

Captiva Life is an multi location insurance company.

The company pays about 3,500 invoices monthly, processed by the corporate accounts payable department.

The accounts payable department staff spend over 30% of their time resolving queries related to misplaced invoices, delayed approval of invoices among other issues.

The company has also encountered duplicate payment scenarios which are often difficult to track because of non electronic storage and indexing of historical invoices.

With the electronic invoicing and workflow capabilities provided by Zingerpay, Captiva no longer has a backlog of invoices for processing and also now has unprecedented levels of visibility to invoice and payments statuses.

The Payment Analytics functionality from ZingerPay has introduced a highly strengthened control environment and addressed the duplicate payment problem.

This is in addition to time and cost savings from the efficiencies created from Zingerpay. Captiva is saving almost 300 hours per month in combined time savings from the new process.

**Find out how ZingerPay can help your Corporation Save  
Time and Money.**

**Time Savings Calculation**

Combined corporation time savings  $[(7.5 \text{ minutes} * 3,500 \text{ invoices}) - (2 \text{ minutes} * 3,500 \text{ invoices}) = 17,500 \text{ minutes (291 Hours)}.$
