

INTELLIGENT PAYMENT AUTOMATION

Efficient And Affordable
Solution Delivering
Substantial Cost and Time
Savings with Built in
Compliance and Controls.

MID SIZED BUSINESS USE CASE

Rapido Construction Limited is a 50-person construction company providing range of services from major remodeling to design and build of brand new multi dwelling communities.

The company pays around 200 invoices monthly, processed by the office manager. The office manager is often inundated by follow up requests from internal and external sources for status of supplier payments.

With the electronic invoicing and workflow capabilities provided by Zingerpay's Intelligent Payment Automation solution, Rapido Construction no longer has a backlog of invoice processing and now has unprecedented levels of visibility to invoices and payments statuses.

This is in addition to time and cost savings from the efficiencies created from Zingerpay. Rapido Construction is saving over 17 hours per month in combined time savings from the new process.

Find out how ZingerPay can help your mid sized business Save Time and Money.

Time Savings Calculation

Combined manager and office manager time savings $[(7.5 \text{ minutes} * 200 \text{ invoices}) - (2 \text{ minutes} * 200 \text{ invoices})]$
= 1,000 minutes (~17 Hours).
