01

MOCK-UP REVIEW

Inspection of mock-up furniture pieces, and making necessary adjustments as required.

Conducting mock-up checks is crucial prior to actual production to prevent errors and ensure that dimensions, style, color, and other critical elements are finalized before mass manufacturing begins.

02

SAMPLE REVIEW

Reviewing material samples, and deciding which is best suitable in the design.

This stage is particularly crucial as we endeavor to strike a harmonious balance between the materials and the surrounding interior elements.

Selections encompassing the suitable wood tones, material thicknesses, and appropriate finishes are meticulously made at this juncture.

While this phase demands a high level of attention to detail, every effort invested is integral to achieving a design of utmost quality.
