your home and doctor's office

How to add a Blood Pressure Monitor

(Once added, no need to repeat before each measurement)

Unified Care Technical Support
(866) 899-3998

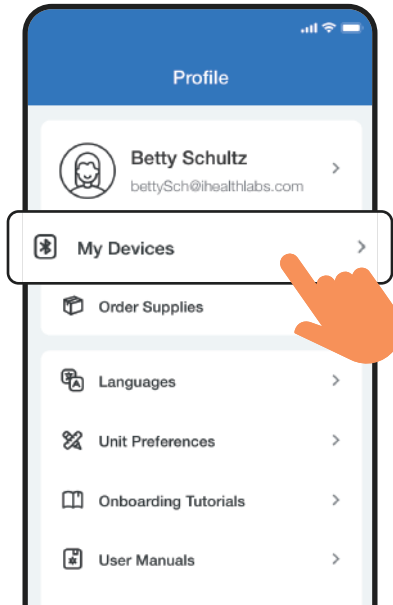

- 1 Open the iHealth Unified Care App.
Tap **"Profile"** in the bottom right corner.

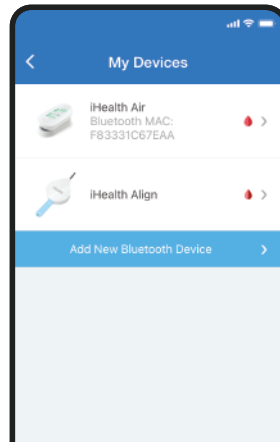

Make sure your
Bluetooth is ON

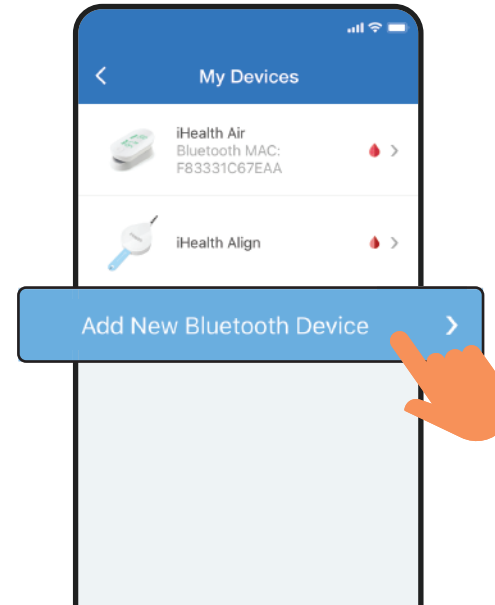

2 Tap on "My Devices"

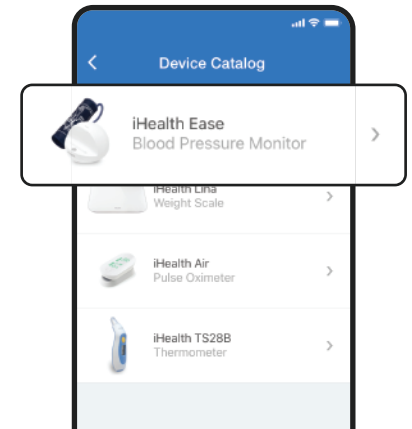

Then, you'll see a list of devices connected to your phone.

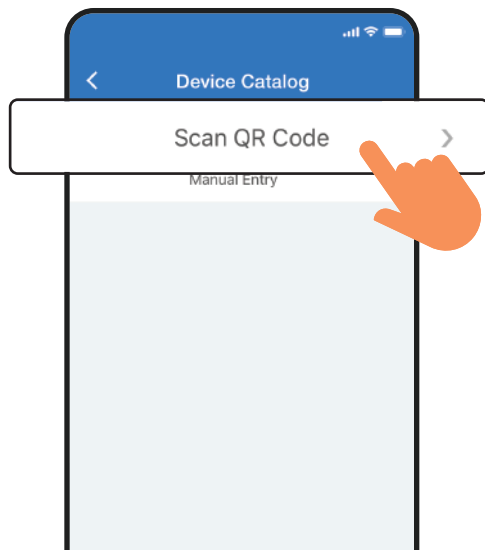

3 Tap on "Add New Bluetooth Device"

Then, choose **"iHealth Ease"**

4 Tap "Scan QR code" and hover your phone over the barcode on the bottom of the device.

Make sure you have plenty of light and the code is in focus.

5 When device page show up, tap the button "Add Device"

Then, tap **"Home"** on the bottom left. And you are ready to measure blood pressure.
