Custom-Designed Garages

The **Keystone Series** *Custom-Designed Garages*

Why Choose Custom-Built?

We design and build our structures to meet each customer's unique needs. Whether you are looking for a simple single car garage, cabin retreat, or an elaborate 2-story workshop, we are here to provide you with a full-service experience. No matter what your structure needs may be, we have a solution to make it all come together. You'll find that we are dedicated to providing you with quality, long-lasting, durable construction in all our structures. We specialize in storage sheds and garages. All of our structures are built locally in Lancaster County, and we offer both pre-built and on-site construction.

We've satisfied thousands of customers over the past 20 years. You can be next! What do you want to accomplish with a new structure? We will design and build your shed or garage for your specific purposes. You'll find many unique examples in our catalog.

What Our Customers Are Saying

"Our custom garage is amazing! The office staff was friendly & helpful. The delivery guys were professional and courteous. Highly recommend!"

Jessica Conroy

"This is a fantastic company to work with. We were able to customize a garage. They made sure that everything was exactly the way we requested. We will absolutely do business with them again."

Stacy Bassett

"I just wanted to circle back with you to let you know how pleased I am with the garage. Meeting the sales team was a complete delight as well.

The garage is more of a "beautiful cottage," which is what I was looking for. Thus ends a 10-month search and research for the perfect garage, and I am 100% confident that I made the right decision going with the company for this awesomely engineered and very well built out-building on our property.

Beautiful. Thank you. I am incredibly satisfied."

John

Garage Specs

Quality pre-built or fully customized
garages build on-site

Architectural drawings available
Stamp and seal optional

To improve the life and stability of your building, we recommend creating a level stone base or concrete floor. This allows water to drain away from the structure, preserving your floor for many years.
