Max G Force: 4
Min. Passenger Height: 48 inches (1.22m)

The Space Shot is the ride that started it all for S&S. Renowned for its unique smoothness during a rapid 4-G vertical launch and then dropping into a breathtaking negative 1-G descent, the Space Shot is a pure rush.

The Turbo Drop begins with an impressive ride up the tower, and then, after a brief pause, blasts downward with a beyond-freefall negative G-force experience.

The Combo Tower combines the legendary Space Shot and Turbo Drop into one hair-raising amusement attraction.

The Double Shot Tower launches you through two cycles of positive and negative "G" experiences – back to back!

The Rotating Tower has a new addition of one revolution at the top of the tower after space shot up before turbo dropping you downward.

FEATURES

High Visibility
