FREE STANDING WORKING STATION

The Lamina Free Standing Working Station is a highly flexible machine for hot-melt gluing where cold gluing could be added as an option. The Working Station is equipped with its own programmable glue unit for up to four glue guns.

The material is fed manually directly into the Working Station. After applying the glue the sheet is controlled by four vacuum belts for perfect registration.

The Working Station is especially developed for larger multi-part displays, shelves, large back supports etc.
