PACKLINE

The Lamina Packline is a fully automatic high speed & high capacity non-stop box closing machine for the internationally recognized corrugated FEFCO 410 box.

With the integrated Lamina Industry 4.0 it will give you perfect control over your packing process.

This unique production line incorporates pin-point precision gluing, folding/flap-folding and accurate closure of the completely packed & labelled box, producing fast a strong and high quality product in 'one-pass' ready for direct distribution to the customer.

In comparison with many other box types the Fefco 410 do not have tape or staples for the closure so it gives your packed product added value by the clean look and it is to 100% recyclable.

- Lamina Industry 4.0 open to integrate with MES, ERP system.
- Up to 400 completed packed boxes p/h for 1-2 operators
- Efficiency increase by 3 times
- Environmental friendly packaging, no tape or staples
- Constantly very high strength quality packaging
- Modules concept for tailor made
- Automatic label (RFID, Q2, BARCODE etc.)application for quick distribution
