

RE-USABLE STRAWS SAVE THE PLANET.

Choose from SILICONE, STAINLESS STEEL or GLASS material

ONE-OFF or REUSABLE?

Plastic straws cause pollution and damage to the environment during its entire lifespan. One way to reduce the impact of plastic straws on the environment is to simply stop using plastic straws: You can either drink directly from a cup, or use a reusable alternative to plastic.

**It's time we start taking care of Mother Earth.
Make a decision to start using reusable straws today!**
