

COTTON MESH BAGS

YOU SEE THE DIFFERENCE.
A TURTLE DOES NOT.

Say **No To** Single Use Plastic Bags

Plastic bag can take 400 to 1000 years to break down in the environment

Less than 1% of all bags sent to recycling plants world wide and remaining 99% ended at soil, beaches, water bodies. Can poison fish, birds and wildlife.

PLASTIC

- Cannot dissolve in nature
- Contaminates environment with microplastics that can end in foodchain

MICRO PLASTICS

1 SECONDE
TO MAKE A
PLASTIC BAG

20 MINUTES
OF USE

MORE THAN
450 YEARS
OF POLLUTION

Burning plastic bag emits toxic gases that harm the atmosphere & human health.

Toxic chemical release during manufacture.

Huge amount of oil is consumed to make plastic bags. Up to 100 million barrels of oils are needed to make world's plastic bags each year

eco friendly alternatives

Perfect for carrying home fruits and veggies from the supermarket or to store your greens in the fridge and kitchen MOQ 1000
