

VIAPIX

VX Zeus

VX Zeus Gateway Hub

Key Benefits

- Low power consumption
- All-in-one device
- Compact
- Cloud capable
- Weatherproof case
- Customizable LTE Modem

Applications

- Data transmission to the cloud in remote environments
- Ready for wireless transmission

Electrical

- Up to 5-32 Volt System
- Two dry contact relays capable of 5 amps
- Built-in 2600mAh battery

VX Zeus is an internet gateway device that utilizes 4G LTE to communicate to the cloud. It comes in a weatherproof case with external harness.

What makes VX Zeus stand out is its on-board GPS, BLE, and LoRa capabilities which can be configured to allow many different types of devices to connect and have their data forwarded to the cloud to be then displayed to end user.

Product Features

- 5 – 32 Volt input for power
- BLE 4.1 with BLE 5.0 option upcoming
- LoRa and LoRaWAN capable
- 4G LTE
- CAN bus interface
- Over-The-Air (OTA) updates via LTE
- GPS with built-in antenna
- Connector for external GPS antenna
- Two 5 amp 5-32 volt relays
- Two 5-32 volt isolated inputs
- Wired connections for external devices
- Customizable to exclude certain modules

Interfaces

- Cellular LTE
- BLE
- CAN w/ J1939, ODBII
- GPS
- LoRa/LoRaWAN
- USB
- RS232/TTL
