## B6 INSTALLATION REQUIREMENTS

### BLENDER SPECS\*

**DIMENSIONS:** 15.25" W / 25" D / 42" H

**WEIGHT:** 125 LBS

**CERTIFICATIONS:** NSF, TÜV, SUD

\*Add the dimensions of desired freezer to the dimensions of the blender when planning for necessary equipment space.

### INSTALLATION REQUIREMENTS

- Requires a dedicated 15A, 120V circuit
- 7 FT. grounded power cord (included)
- Freezers require 15A or 120V circuit separate from blenders

### DRAINAGE

- Gravity drain required
- Blender comes with 10 FT. length of 3/4" ID anti-microbial drain tube

### FILTERED

- Filtered water source - minimum filtering of 100 PPM hardness and 150 PPM TDS
- Minimum pressure of 25 PSI
- Provided in-line regulator quick-disconnect fitting with barbed end for use with 1/4" ID braided input water line (provided by customer)

## THE SELF-SERVE BLENDING BAR

**The Blending Bar:** Our most popular blender and freezer configuration.

## HOW IT WORKS

The self-serve program allows consumers to simply “Pick”, “Peel” and “Place” their cup in the blender. Want know the best part? Your customers get to choose their own flavor and the product thickness.

The blender is internally self-sanitizing and rinses between blends, meaning less work for employees and more sips for your customers.

**Minimal-touch blending for quick on-the-go convenience**

**Integrated internal cleaning system automates sanitization**

**Large LCD screen shows engaging content & the lower touch-screen panel displays easy instructions**

**Service Alert™ Diagnostics provides maintenance alerts along with online training and live support team**
