Data Quality Assessment
Effeciently ensure high quality migration data

Is your data ready for Veeva?

UNDERSTAND RESOURCES NEEDS

One of the biggest challenges that migrations face is underestimation. Frequently, Life Science companies downplay migrations as "just one" part of the implementation process. Yet, the process is more complex than they think. With a Data Quality Check, you can better understand resource requirements from the start.
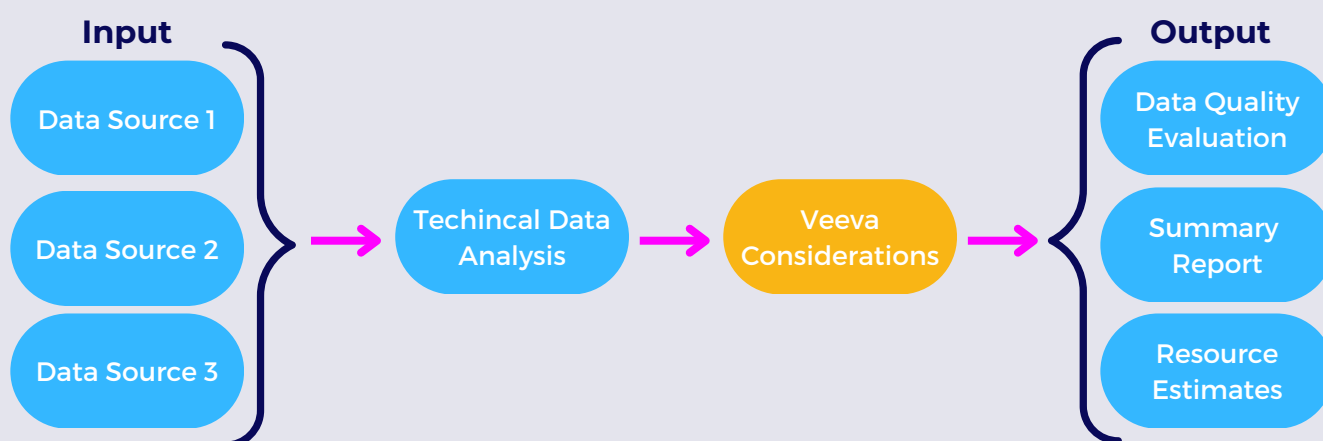

EFFICIENTLY CHECK DATA QUALITY

Short on time? Need to make a decision quickly? Let Epista's team assess the quality of your data in under 2 weeks. In this time, you'll get a clear understanding of everything you need to make informed decisions. This includes resource estimates, a data quality report, and a cleaning effort estimate.

DECREASE PROJECT RISK

Veeva implementation projects inherently come with risk. Minimize this risk as much as possible by understanding the quality of your data, knowing the required resource allocation, and preparing for possible improvement areas ahead of time.

Epista's Data Quality Assessment Framework

Input

- Data Source 1
- Data Source 2
- Data Source 3

→ Techincal Data Analysis → Veeva Considerations →

Output

- Data Quality Evaluation
- Summary Report
- Resource Estimates

What is included?

Data Quality Overview:
As a part of Epista's Data Quality Assessment, you will get a high level output of the overall quality of your data. This includes a look at your metadata, the consistency of your data, data mapping evaluation, and more where necessary,

Improvement Areas:
In addition to the overview, you will also receive a categorized collection of areas where your data can be improved. This gives your team a better understanding of what exactly needs to be done (including Veeva-specific changes) and a place to start from.
Resource Allocation Estimates:
The Data Quality Overview and detailed collection of improvement areas will together give you a base to estimate how much work needs to be done. With this information, our team can help you determine both internal and external resource needs.

Expert Migration Support:
Your Epista migration expert(s) will not only help you understand your Data Quality Assessment, but can continue to provide support throughout your migration process. From automation to best practice, you will be provided with professional advice and knowledge.

Functional Feature: Traffic Light Visualization

Epista's Data Qualirty Assessment is designed to simplify the process. That is why the data quality output uses a traffic light style visualization to help you understand the quality of your data with one simple glance.

Green = Strong
Yellow = Okay
Red = Weak

About Epista Life Science
Epista Life Science is a team of experts working to continuously improve compliance and business. We do this by pioneering new methodologies and implementing technologies to help Life Science companies balance risk and efficiency to achieve more. As a Veeva Preferred Service Partner and trusted implementation partner, we are confident that our experts can ensure you get the most value out of your Veeva system before and after migration.

Can Epista help you?
