

Incident Manager

REIMAGINING FACILITY COMPLIANCE

Incident Manager automatically routes incident notifications. It prioritizes cases by color-coding, log or reporting. You have the ability to track incidents using the officer's narrative to manage security. On-the-go mobile incident reporting is built right in. You can receive instant access to detailed incident reports through the incident log for administrators and dispatchers. Incident Manager allows for custom dashboards and reports to support process improvement.

Benefits of Incident Manager

- ✓ Color-coding, logging and reporting all prioritized by case
- ✓ Mobile incident reporting
- ✓ Custom reports and dashboards to support process improvement
