

PIPE COVERS

Shield, protect and save *your* safety relief valve discharge piping *and* free-vented rupture discs from chemicals, rain, snow, insects and birds.

In addition to protecting your equipment and investments from damage, OsecoElfab's pipe covers offer a strong visual indication of overpressurisation. A 6ft tether rope retains the cover when the system relieves pressure.

Pipe covers are constructed out of PTFE-coated fiberglass material, with drawstring and grommet to attach the cover and prevent loss during an overpressure event. The covers fit easily over straight- or angle-cut discharge piping.

Standard sizes range from 1" to 54", available in the standard color of safety/neon orange. Please specify whether straight- or angle-cut covers are desired.

Sizes 1" through 54"

Fits over straight- or angle-cut discharge piping

Tether retains cover after a relief event

Neon orange offers visual indication of overpressurization

Let us help you with all your pressure relief questions.
