

# Chicago Children Services Community Assessment 2021

## **Executive Summary:**

The Chicago Department of Family and Support Services (DFSS) administers Chicago Early Learning (CEL) programs for children under age six and their families in community-based organizations and schools across Chicago. CEL programs include federal Head Start, Early Head Start, Early Head Start-Child Care Partnership and Expansion, State Pre-K and Prevention Initiative, and Site-Based child Care Assistance Program. Through these programs DFSS serves approximately 15,000 children annually through a network of 26 federally funded sub-recipients and an additional 72 Preschool for All, Prevention Initiative, and Child Care delegate agencies.

A requirement of Head Start funding, the Community Assessment provides annually updated demographic and well-being data about young children and their families via three community assessment websites updated annually by Chapin Hall Center for Children, to keep data in one location, Chapin Hall as combined all data into one location:

[https://chaphinhall.shinyapps.io/eci\\_tract\\_version/](https://chaphinhall.shinyapps.io/eci_tract_version/). DFSS conducts a comprehensive community needs assessment and issues a quinquennial community assessment report, once every five years, the latest, *Children of Chicago: A Community Assessment 2019*, released in January of 2019 and available on the DFSS website. The next quinquennial report is scheduled for release in 2024.

In addition, DFSS periodically provides community assessment update briefs that address significant changes or developments in the early childhood landscape or the wellbeing of Head Start-eligible children and families. With the onset of COVID-19 in early spring of 2020, just such a development occurred.

This Community Assessment Update focuses on the impact of COVID-19 on CEL community-based programs for PY 2020-2021. While it captures some of the preliminary data concerning the immediate impact of the pandemic on delegate agencies, CEL programs, and children and families, it does not address the short and long term economic and health consequences of the pandemic. During the course of the pandemic, DFSS has used various tools at its disposal to assess the needs of its children, families, and agencies. Housing assistance, food assistance, infant and toddler supplies, and wi-fi access have all been critical needs. In addition, DFSS and its agencies have provided families with resources to support early learning and child and family mental health, which has been a main focus of DFSS and its agencies.

DFSS CEL delegate agencies remained open and continue to serve children and families, both in person and remotely. Agencies continue to find innovative ways to connect with families and provide children with an early learning foundation.

**I. Chicago Early Learning (CEL)/Department of Family and Support Services (DFSS) Background:**

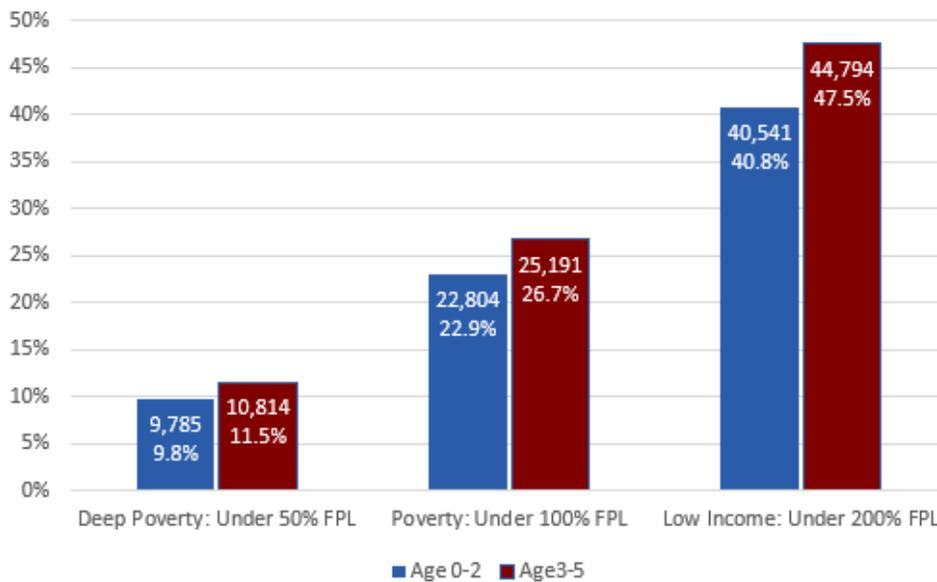

Chapin Hall revised our methodology for estimating the number of children below the poverty level and the number eligible for Head Start and PFA. The significant disruption of the COVID-19 pandemic made previous assumptions of smooth economic and demographic changes invalid, requiring a full rethink of how forecasting could be done. Please see below for a description of the methodology change

According to Chapin Hall, approximately 193,585 are children under the age six of which approximately 47,995, or a quarter, live at or below the Federal Poverty Level. Approximately 22,804 0-2 years old or 22.9% and 25,191 or 26.7% 3-5-year old’s live below 100% of the Federal Poverty Level, and approximately 9,785 or 9.8% 0–2-year old’s and 10,814 or 11.5% 3–5-year old’s living at or below 50% of the Federal Poverty Level.

DFSS through its network of 26 federal sub-recipients and roughly 80 sites, provides Chicago Early Learning (CEL) programs for over 4,500 children and families annually in center-based, family childcare home, and home-based models. DFSS has funding for 1,489 Head Start children, ages 3-5 years old, 1,100 Early Head Start-Child Care Partnership children, 0-3 years old, and 1,267 Early Head Start and 200 Early Head Start Expansion children and pregnant women.

As demonstrated in Table A below, nearly half of children less than age six in Chicago live below 200% of the Federal Poverty line and around a quarter live below the poverty threshold.

**Table A: Chicago Children Under Age 6 in Poverty, 2020**

These poverty rates are a slight decrease from our 2019 estimates, despite the start of the COVID-19 pandemic in early 2020. According to analysis by the U.S. Census Bureau, expanded unemployment insurance benefits under the CARES act significantly lowered the number of people who would have fallen under the federal poverty level in 2020 without those benefits. Expanded unemployment benefits had the biggest impact on children under eighteen.

See: <https://www.census.gov/library/stories/2021/09/did-unemployment-insurance-lower-official-poverty-rates-in-2020.html>.

In fall of program year 2020-2021, over 20,000 children were enrolled in at least one CEL program model; the vast majority of them (80%) being pre-school aged and served in center-based care. Enrollment numbers were lower than in previous years due to the COVID-19 pandemic.

**Table B:** Chicago Early Learning Program Capacity at DFSS and CPS Funded Sites, Fall PY 2020-2021

	Total 0-5	
Total Slots 0-5	39,072	
DFSS Child Care 0-5	1,558	
	Infant/Toddler	Preschool
Age Group Slots	7,981	29,533
EHS/HS Slots	3,817	6,745
PI/PFA Slots	4,674	22,779

**Table C:** Chicago Early Learning Program Enrollment at DFSS and CPS Funded Sites, Fall PY 2020-2021

	Infant/Toddler	Preschool
Total Enrolled	4,112	17,159
Total Enrolled in Center-Based Care	2,307	16,920
Total Enrolled in FCCH	73	67
Total Enrolled in Home-Based Care	1732	172
Total Enrolled in CPS Schools	NA	11,395
Total Enrolled in DFSS Funded Programs	4,122	5,764
Total with any EHS/HS Funding	2,136	4,858

- For complete data concerning child poverty and HS eligibility by community area, see Appendix A.
- For data concerning program enrollment see Appendix B.
- For data reflecting health and well-being see Appendix C.

For other data concerning Chicago Early Learning Indicators Tool sponsored by DFSS, visit: [https://chapinhall.shinyapps.io/eci\\_tract\\_version/](https://chapinhall.shinyapps.io/eci_tract_version/)

## **II. Impact of COVID-19 on DFSS CEL Community Based Organizations (CBOs) & Services**

DFSS sent COVID-19 related information and guidelines for protecting children, families, and staff in its weekly email blasts to agencies, the CSD Update, beginning the week of March 9, 2020. Some agencies began to close as early as March 14, 2020, and by the end of March, cases in Illinois had surged to an extent that Illinois Governor Jay Pritzker responded with an executive order requiring all individuals to stay at home and all businesses to shut down, with the exception of essential businesses, public safety institutions, and government functions (Executive Order 2020-10).<sup>1 1</sup> To read the full executive order, please click the following link: <https://www2.illinois.gov/pages/executive-orders/executiveorder2020-10.aspx>

### **Moving Forward**

As Illinois continues to outpace national vaccination rates and COVID-19 trends across the state, Governor Pritzker announced the entire state will move into the Bridge Phase of the Restore Illinois reopening plan beginning Friday, May 14, 2021. The Bridge Phase will allow for expanded capacity limits for businesses and gatherings before the state moves to a full reopening in Phase 5.

Based on our continued improvements, the city moved to the Chicago Bridge Phase in conjunction with the state on Friday, May 14th. This next step in our cautious and responsible reopening plan allows for an extensive expansion of capacity limits across industries that broadly align with state regulations – details are available on the reopening website and more information will be shared in the coming days to help businesses prepare for the new regulations.

For additional information visit the Governor’s Office of Early Childhood Development <https://www2.illinois.gov/sites/OECD/Pages/COVID-19.aspx> and the City of Chicago <https://www.chicago.gov/city/en/sites/covid-19/home.html>

### **Emergency Child Care for Essential Workers**

Childcare centers were included as one of the essential businesses allowed to remain open if they applied for and received an emergency license by following regulations specifically enacted for emergency day care programs for children of essential workers--employees exempted from the Executive Order. These employees needed to have childcare in order to continue essential duties during the initial onset of COVID-19. Although some childcare and day care agencies were permitted to continue operations, the Gubernatorial Disaster Proclamation suspended other operations such as family childcare homes and entities not listed in the executive order and emergency childcare act. At the same time, the Federal Office of Head Start ordered the closing of all Head Start in-person operations. Only CEL community-based learning centers not receiving Head Start funding could continue to provide in-person services if they received an emergency license from Illinois Department of Child and Family Services (DCFS). About 10 of DFSS’s CEL agencies were permitted to continue daily operations.

### **Remote Operations & Learning for Families**

CEL agencies continued services remotely during the statewide Stay-at-Home-Order. Agencies were expected to maintain communication with families and implement remote services that meet the needs of families during the stay-at-home order. DFSS issued guidance to agencies for remote learning and providing family engagement support. These guidelines included an array of e-learning resources that programs could share with parents to help parents support child learning from a distance. Free resources were provided through links sent in the CSD Updates to agencies, such as Ready Rosie toolkits that include learning at home activities, prevention, care methods, and supports for emotional wellbeing. Resources for teachers to share with parents included activity suggestions for remote learning, sample schedules to replicate a typical preschool day and experiences at home, and letters to families that explained key things to consider as parents help their children transition to spending their days at home.

Early learning educators and child development experts at DFSS and CPS created a webpage for parents to easily find resources to support their children's development and learning during the pandemic. The website contains guidelines and activities tailored for individual age groups, infants, toddlers, and pre-school aged children. Families could also discover resources on the website such as learning resources, health and wellness, news & updates, technology guides for families, and diverse learner resources. Educators could access the site to find resources such as E-learning strategies, remote learning tools, professional development, and other administrator resources. The website is integrated with Spanish language preference. For more information and direct resources for Chicago Pre-Learning, please visit:

<https://www.chicagoprelearning.org/childrens-portal/children#infants-ID>.

### **Ensuring Needs of Families Were Met During COVID-19**

In 2020, DFSS conducted several surveys during the early pandemic to better understand that needs of agencies and their families. DFSS released an emergency needs survey to identify the type and quantity of supplies that would be needed by agencies' families with infants and toddlers and to distribute those supplies. Supplies included diapers, wipes, formula, and nutritional drinks for infants & toddlers. The survey was analyzed for a quick turnaround and the requests were promptly processed for ordering and timely distribution of supplies to agencies to distribute to families.

DFSS also conducted a survey to understand the most requested resources by families during the pandemic. The top requested resources were:

- Housing rental assistance
- Mental health resources
- Assistance needed for formula/diapers/wipes
- Food/nutrition support

DFSS continued to provide information to agencies via its CSD Update to connect agencies with resources that could meet the needs of their families. Lastly, in preparation for reopening, DFSS surveyed its agencies to understand how the Chicago Public Schools (CPS) decision to reopen virtually would impact agency staff, especially those with children in CPS, which might impact parent work schedules in the fall.

## **Maintaining Communications**

DFSS continues to provide guidelines to agencies concerning operating during cold and flu season and the importance of maintaining handwashing protocols, one of the key measures in preventing the spread of COVID-19. Each CSD Update included general resources from the Center for Disease Control (CDC), including hand washing posters for children and adults in English and Spanish, a reminder of postings required in all centers, a reminder concerning tracking attendance and short-term exclusions during cold and flu season, and important local resources, including free health clinics.

## **Executive Director/Program Director Strategic Leadership (EDPD) Meetings**

DFSS continues to conduct its Executive Director/Program Director Strategic Leadership (EDPD) Meetings twice a month to maintain communication with agencies and ensure they were aware of developments concerning COVID. These are held via *Zoom* and cover program expectations and updates, resources, guidelines, planning, and other information related to Chicago Early Learning services.

## **CSD Updates & Alerts**

DFSS sends weekly CEL-related email blast, the CSD Update, kept agencies and staff informed of COVID developments, program expectations and adaptations, and resources for agencies and families during COVID. Resources ranged from notifications about WIC openings, food resources for families, free wi-fi, links, virtual trainings for small businesses and non-profits, emotional well-being tool kits for families with young children, and other resources to support providers during the pandemic with guidance on health, business, child development, and mental health. The CSD Update republished notifications from the Illinois Governor's Office, Illinois Departments of Public Health (IDPH), Chicago Department of Public Health (CDPH), Illinois Head Start Association, and the Office of Head Start.

## **Surveys**

DFSS uses its surveying capacity to elicit information from agencies and parents to shape program planning. Data collection for the grantee's self-assessment was used as an opportunity to get some feedback of the preliminary effects of COVID on agencies as well as begin to identify parent needs. Surveying was used later to gather information about agency needs for the Coronavirus Aid, Relief, and Economic Security (CARES) Act funding and to assess essential supplies that were needed by families in communities impacted by civil unrest. Surveying was conducted to assess agencies' workforce needs in light of CPS's plan for remote learning, and lastly, surveying was used with the Citywide Parent Policy Council (CPPC) to plan for the resumption of meetings during COVID and identified preferred virtual platforms and communications methods.

## **Citywide Parent Policy Council & Chicago Committee on Urban Opportunity**

DFSS maintains contact with the CPPC by sending Program Updates to the full Council and maintaining email communication with its Chairperson and Executive Committee. Through this method, Policy Council members were updated on how to find emergency childcare for

essential workers; remote learning, mental health, and family engagement resources; and updates on CEL programs, including Head Start and State-funded Pre-school for All.

### **Trainings During COVID**

During the Self-Assessment it became clear that one of the unintended benefits of the stay-at-home order was the opportunity it gave agencies that were no longer providing in person services an opportunity to conduct intensive and sustained professional development and training activities with their staff. In addition, agencies were able to access and implement training opportunities available on Teaching Strategies Gold. Currently, agencies have the opportunity to participate in trainings now that programs are no longer remote.

### **Re-opening and Remote Learning**

In June 2020, Governor Pritzker and Mayor Lightfoot announced early learning agencies could re-open with new guidelines on class sizes and protective practices. This was within the 'Restore Illinois' plan. Under guidance from the IDPH, all of Illinois' 5,500 childcare providers that were closed would be able to open with no more than 10 children per classroom when Phase 3 of reopening began. After being open for four weeks, they would potentially be able to expand to larger capacity, at most to 30% capacity or roughly 15 children per preschool classroom, based on their performance. Most licensed childcare homes were also able to reopen to their licensed capacity. All re-openings required that only staff were allowed on site. All providers were expected to resume compliance with all other licensing standards related to curriculum, learning environment, and staff qualifications.

Once COVID-19 cases began to curve as stable or decreasing percentages, agencies could re-open following the Restore Illinois guidance described above. Staff and children over the age of two were required to wear Personal Protective Equipment (PPE)/masks and, when able, maintain the six feet of distance in social settings, at least among adults. While there were concerns about children and staff wearing masks, it was adopted as best practice. DFSS has received two sets of donated, child-sized, cloth masks that were distributed to agencies.

As they reopened over Summer 2021, DFSS delegate agency sites were expected to follow licensing guidelines, Chicago Early Learning Standards (CELS) 2.0, and Head Start Program Performance Standards (HSPPS), and develop a hybrid model to serve children both in person and remotely due to reduced class sizes. Agencies were provided with cleaning guidelines and sample cleaning log templates that they could adjust to their sites. No parents or outside visitors were allowed in centers during this period. Any cases of COVID among children or staff requires immediate reporting to DCFS and CDPH, as well as DFSS as outlined in the CELS 2.0 under immediate reporting. Depending on the COVID case and need for quarantine, individual classrooms and/or entire sites would be closed for 14 days, and staff and children's families would be instructed to self-quarantine over that time. In some instances, staff and children were instructed to take COVID-19 tests before returning to the classroom if warranted by exposure to an infected individual. Sites and classrooms would be deep cleaned and sanitized during that period in accordance with DCFS and CDPH

guidelines. These policies were still in place at the beginning of the Fall 20-21 program year. While sanitization and deep cleaning is constantly in effect at centers and DFSS, it is still a person responsibility for each person to maintain social distancing, hand wash consistently, and wear PPE when social distancing is not possible.

### **DFSS Children Services Division Staffing & Operations During COVID-19**

DFSS maintained an in-office limited staff during the early days of the stay-at-home order, which Children Services Division (CSD) Directors and above coming into the office once a week to ensure open agencies had support and to plan for remote working and learning. DFSS office staff were also instructed to follow the stay-at-home order. At DFSS, only essential workers/government functions were continuing during this time to ensure operations and services were being extended to the city's most vulnerable children and families. A strategy was designed to have employees come into the office on a staggered schedule to retrieve their laptops and other necessary office paperwork and supplies.

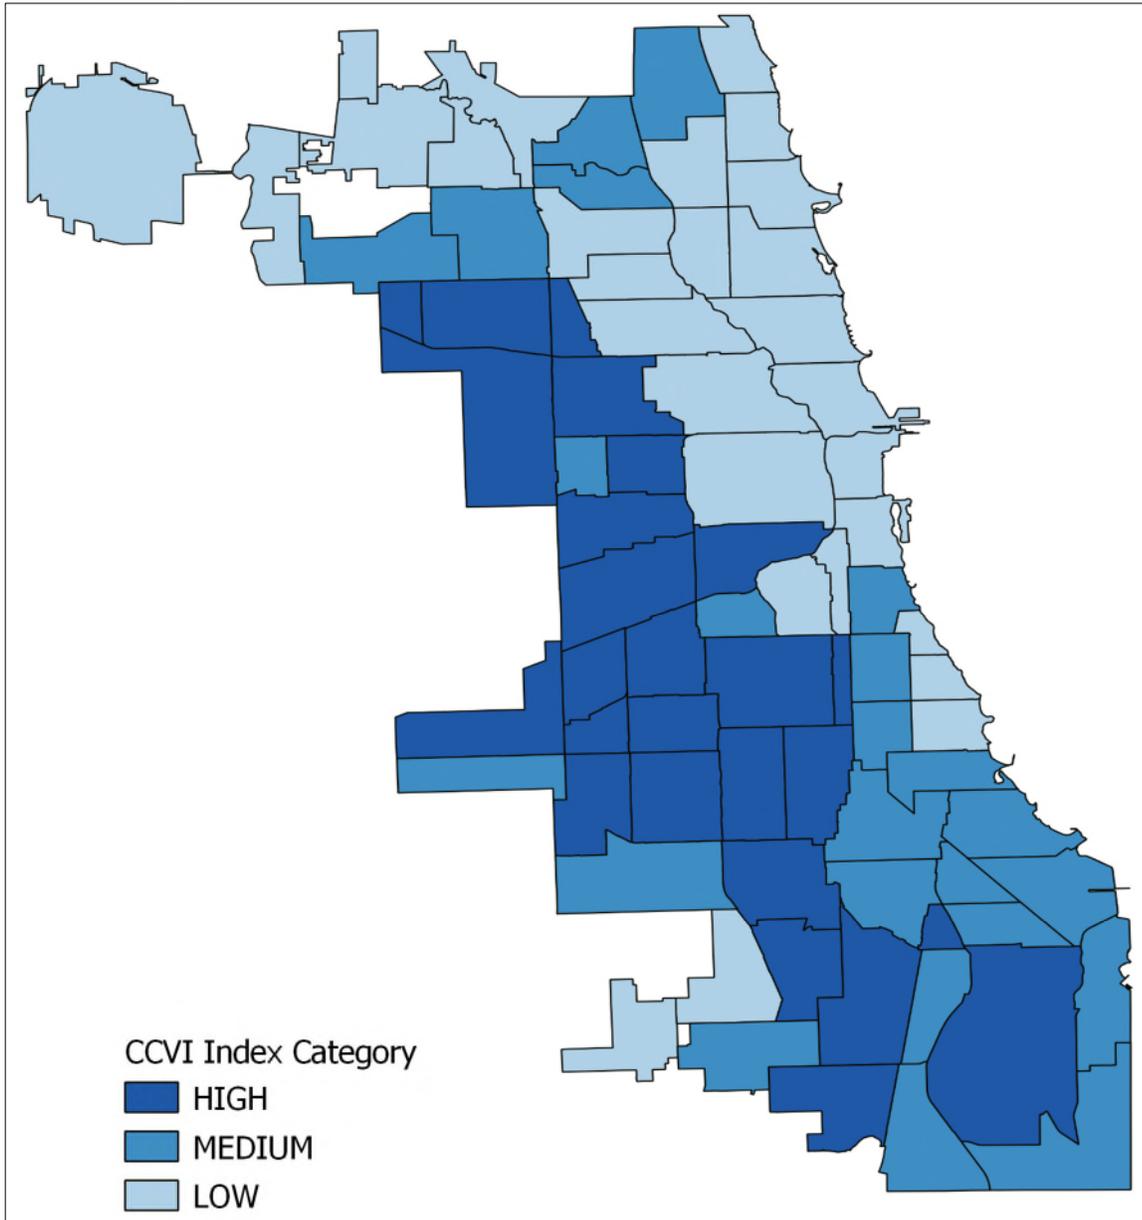

Currently, employees are working five days per week with personal protective equipment (PPE), maintain the 6 feet distance precautions between workspaces and continuously monitor their health for any symptoms that could be related to COVID-19. Employees are also screened prior to coming into the main building with body temperature scanning equipment. Wearing PPE masks is also mandatory in common/public spaces.

### **Chicago COVID-19 Community Vulnerability Index (CCVI)**

The maps presented below use the Chicago COVID-19 Community Vulnerability Index (CCVI) as a base map to highlight where DFSS delegate agencies are serving the most vulnerable children in early learning programs. The CCVI was created by the Chicago Department of Health and identifies communities that have been disproportionately affected by COVID-19 and are vulnerable to barriers to COVID-19 vaccine uptake. Vulnerability is defined as a combination of sociodemographic factors, epidemiological factors, occupational factors, and cumulative COVID-19 burden. For additional documentation on the CCVI index see [https://www.chicago.gov/content/dam/city/sites/covid/reports/012521/Community\\_Vulnerability\\_Index\\_012521.pdf](https://www.chicago.gov/content/dam/city/sites/covid/reports/012521/Community_Vulnerability_Index_012521.pdf)

Figure 1 below shows Chicago community areas by categorization of low, medium, or high on the CCVI index with high indicating the most vulnerable communities. CDPH found that high CCVI score correlated most strongly with high mobility during COVID, low socioeconomic status, high rates of COVID hospital admission and high rates of COVID mortality.

**Figure 1: Chicago Community Areas by Chicago COVID-19 Community Vulnerability Index (CCVI) Categories**

Source: Chicago Department of Health. Data downloaded from the City of Chicago Data Portal on 3/13/2022. <https://data.cityofchicago.org/Health-Human-Services/Chicago-COVID-19-Community-Vulnerability-Index-CCV/2ns9-phjk>

In figure 2 we see that community areas with the highest CCVI scores also have the highest rates of children under age six living in poverty, with community areas on the south and west sides being disproportionately impacted by COVID-19 and high poverty.

**Figure 2: Chicago Community Areas by Chicago COVID-19 Community Vulnerability Index (CCVI) Categories and Percent of Children under 6 below 100% FPL**

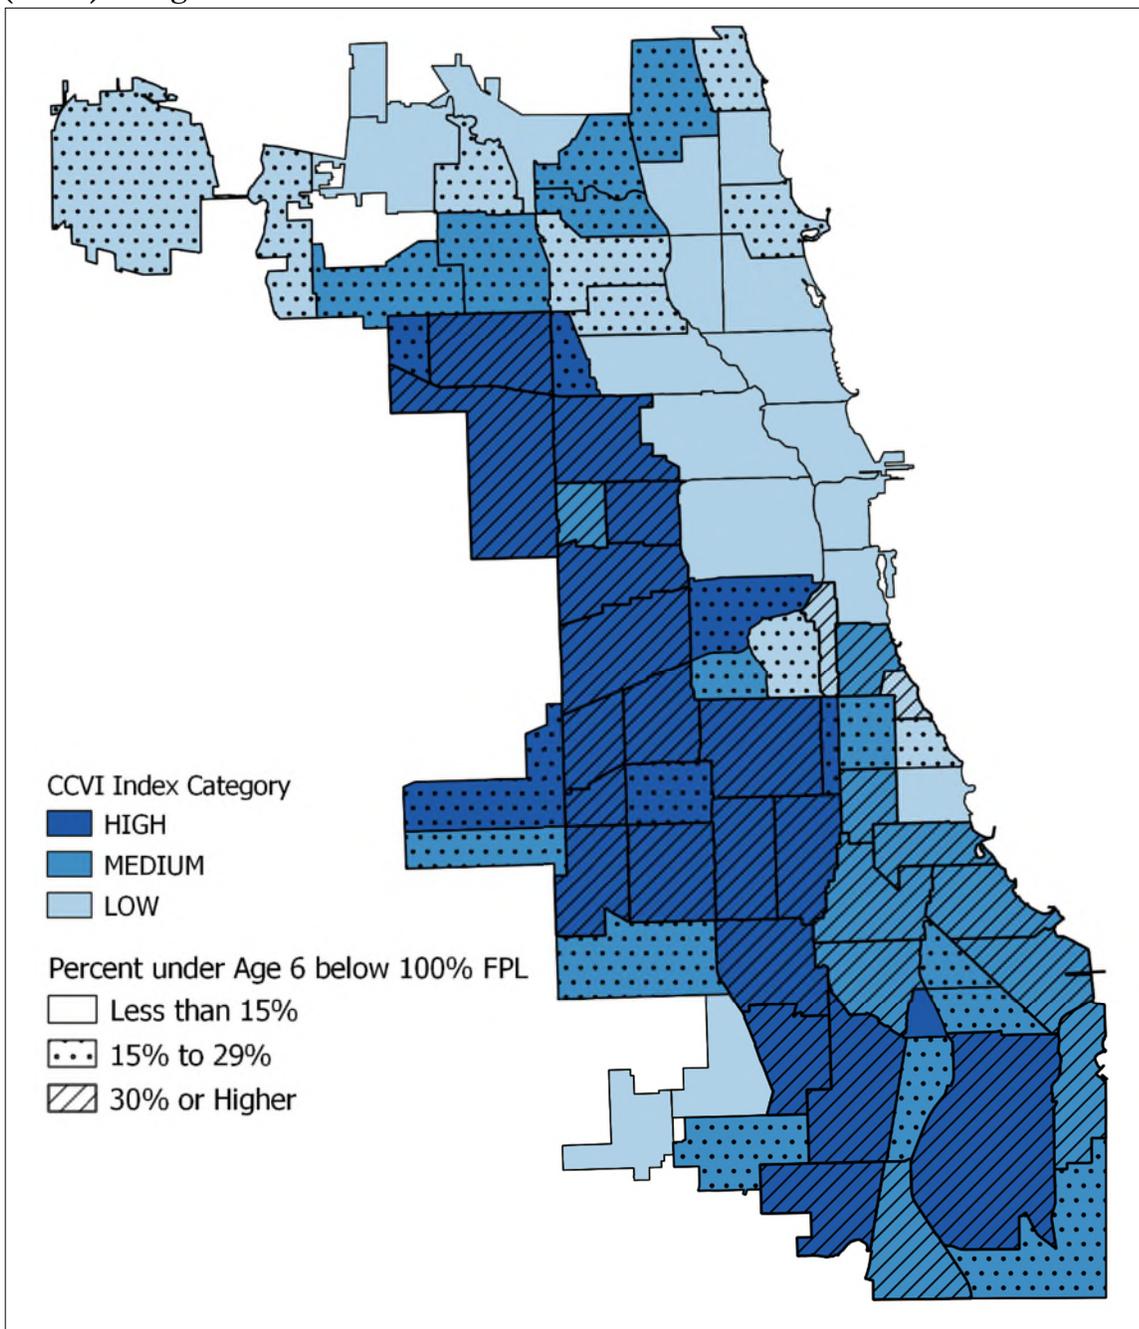

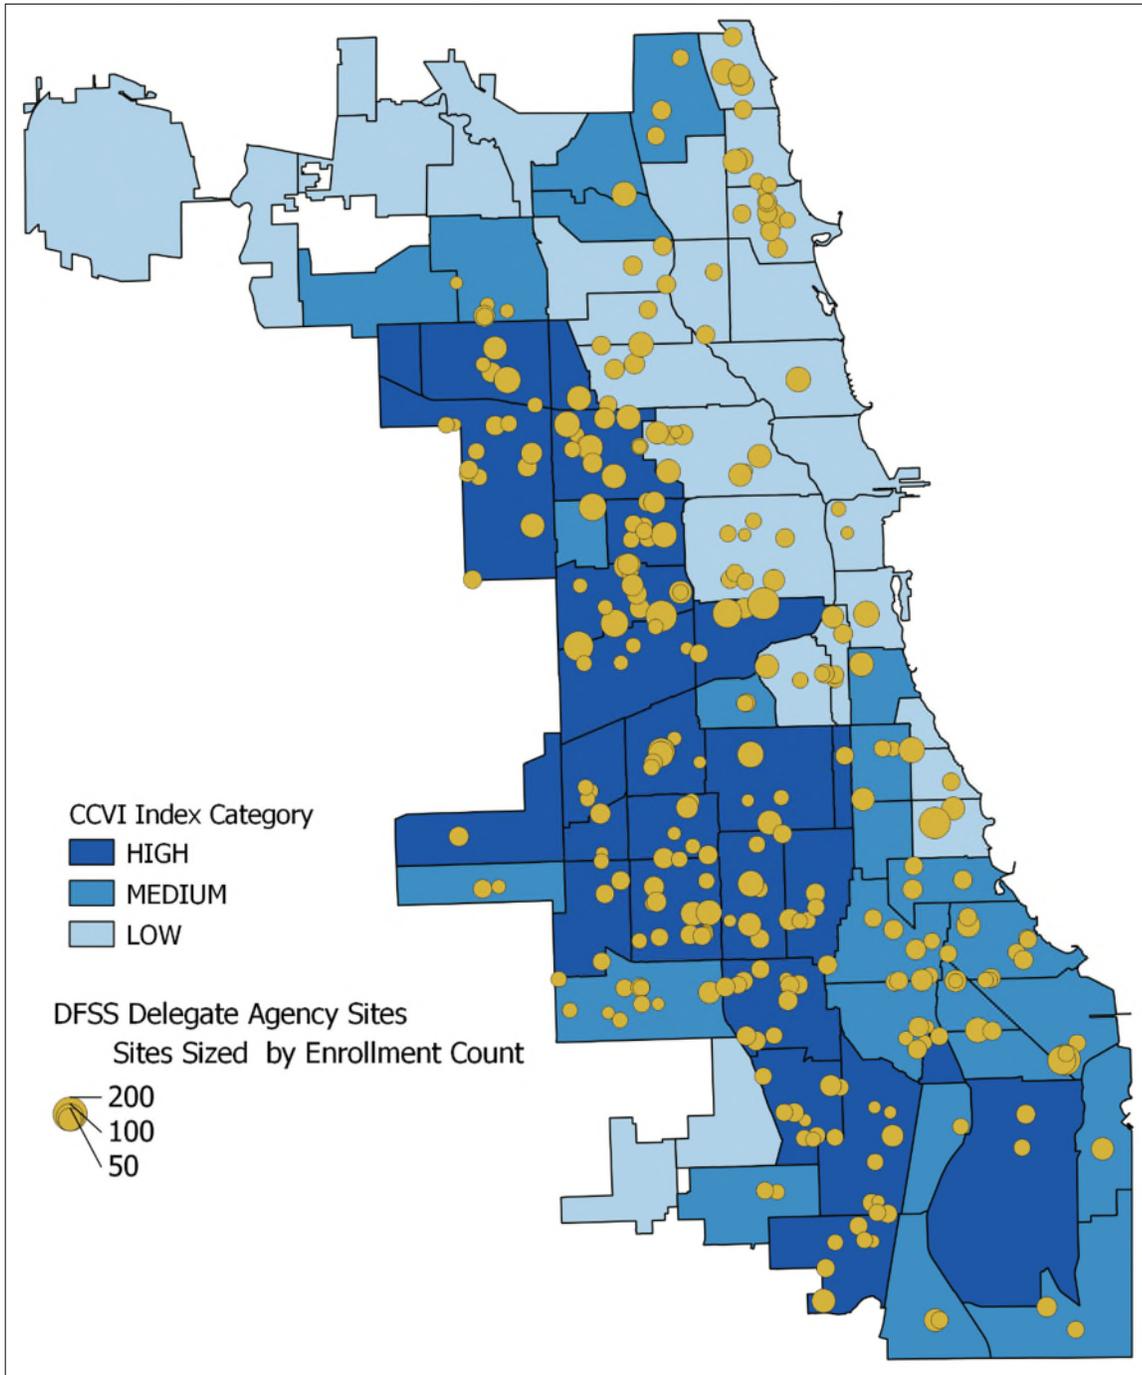

Figure 3 shows early learning sites with funding through DFSS sized by total enrollment in October of program year 2020-2021. Just under half of the children enrolled in fall 2020-2021 (47%) live in community areas with high CCVI scores. Another 27% live in communities with medium CCVI scores.

**Figure 3: Chicago Community Areas by Chicago COVID-19 Community Vulnerability Index (CCVI) Categories and DFSS Delegate Agency Early Learning Sites**

**Table D:** Children Enrolled at DFSS Delegate Agency Sites by Home CCA, October PY 2020-2021

Source: DFSS COPA Enrollment Data and Chicago Department of Health. Data downloaded from the City of Chicago Data Portal on 3/13/2022. <https://data.cityofchicago.org/Health-Human-Services/Chicago-COVID-19-Community-Vulnerability-Index-CCV/2ns9-phjk>

According to the Chicago Department of Public Health, COVID-19 has impacted South and West side communities disproportionately. The disproportional rate of infection and death may be tied to social determinants of health and structural inequalities that impact south and west side communities, including factors such as poverty and chronic health conditions such as diabetes and asthma, living in areas of increased air pollution, distance from medical services, and reduced access to PPE. Chicago's South and West side communities have experienced greater social vulnerability before COVID-19. It is often found that increased social vulnerability is also associated with greater health inequality outcomes. With these factors combined, existing structural vulnerability and health risks produce the current racial inequality in COVID-19 outcomes in Chicago.

### **Health Equity**

While there is significant data of COVID-19's impact on Chicago's most vulnerable communities, the effects of COVID-19 may also be longer lasting even after the pandemic is controlled. Factors such as health care access, housing, employment, and education may all be negatively impacted. In addition, the present health inequities can also impact the inability to treat underlying chronic conditions in vulnerable communities due to lack of access to medical treatment and clinic closures. In Chicago's South and West side communities where these disparities are extensive, the impact of COVID-19 may also impact food insecurity due to disruptions of food supply chains, access to adequate and nutritious foods due to shelter-in-place orders, and loss of income.

The importance of partnerships of public health officials and policy makers is crucial to engaging health inequities and avoiding further health disparities. Community stakeholders, public health professionals, and health sector leaders should collaborate to create policies that address the critical health needs of Chicago's most susceptible communities as well as address social injustices. These policies should directly encourage best practices in community health as an effect of this unprecedented health crisis. It is possible that the repercussions from this pandemic may extend over the coming years while the City of Chicago continues to develop solutions to aid the most affected.

### **Economic Impact on Chicago and CEL Communities**

Results from a survey conducted by the University of Chicago Urban Labs (August 2020) suggest that the pandemic had already caused massive dislocation among small businesses just several weeks after its onset and prior to the availability of government aid through the CARES Act. Approximately, 43% of businesses had temporarily closed, and nearly all these closures were due to COVID-19. Businesses that had temporarily closed largely pointed to reductions in demand and employee health concerns as the reasons for closure, with disruptions in the supply chain being less of a factor. On average, the surveyed businesses reported having reduced their active employment by 39% since January. The impact of the pandemic on small businesses, their employees, and the larger economy, is especially severe. Small businesses employ almost 50% of American workers, and the pandemic revealed the financial fragility of many small businesses in times of sustained crisis. During the pandemic, employment had also fallen by 40%. In April 2020, Illinois unemployment rose to a staggering rate of 16.4%. Job losses were heavily

concentrated in the leisure, hospitality, transportation, and small business sector including having a large effect on restaurants. The direct job losses in these sectors further increased unemployment in other sectors, as the individuals affected reduced their own spending. As a result, the State of Illinois, like many other states, will heavily rely on federal assistance to overcome the financial implications now and in the future. However, these losses will take years to stabilize since it is becoming a realization that the economy could have been affected further than the Great Recession of 2008.

### **Needs of CELS Families during COVID-19**

In order to determine the needs of CELS families during COVID-19, DFSS included questions concerning parent experiences with providers during the coronavirus pandemic and their plans and concerns regarding their children's return to programs in its parent-directed self-assessment survey in the late spring of 2020. The survey was conducted electronically by Chapin Hall and contained a potential bias in that it was distributed by email and only parents with functioning emails received it. Parents who provided email addresses are likely different than parents who did not provide or who do not have an email address in ways that the researchers could not observe. Second, only a minority (12.8 percent) of parents responded to the survey. Because of the suspected differences among respondent parents, the presented findings cannot be taken to be fully representative of the population of families enrolled in DFSS CBO programs, but nonetheless provides us with an insight into parents' thoughts and feelings during the pandemic.

COVID-19 has impacted communities across Chicago and caused stress and fears amongst the public, including CEL Head Start parents. Survey-responding parents indicated that the pandemic raised concerns regarding their children's return to programs in the fall of 2020, a fear we have since seen play out in dramatic under-enrollment across CEL community-based programs as well as CPS school-based preschool programs. During the stay-at-home order, families in DFSS early education programs were able to engage with providers virtually.

### **COVID-19 Impact on Cases Abuse and Neglect**

During the pandemic, reported cases of child abuse and neglect decreased, according to a brief by Chapin Hall released in November 2020, although it is suspected that this is not a result of less instances of child mal-treatment, and more the result of the decreased access of mandatory reporters to children and families due to the state's stay-at-home order. Typically, reported cases increase in the fall when children return to school and decrease over summer vacation when mandatory reporters see children and families less often. Given the impact of COVID on families' economic condition and mental health, child welfare advocates have expressed concern that instances of unreported maltreatment have been on the rise, and when in-person school resumes, child welfare agencies will see an exponential increase in the number of cases. To read the full brief, please access the following link:

<https://www.chapinhall.org/wp-content/uploads/Covid-and-Child-Welfare-brief.pdf>

### **III. COVID Impact on Head Start Enrollment & Attendance**

Over the summer of 2020, DFSS and its partners including the Mayor's Office, Action for Children (the local childcare resource and referral agency), and CPS planned for a robust recruitment season, acknowledging that social distancing rules and continued COVID outbreaks

might impact in-person events and the ability to conduct door-to-door canvassing. Agencies were able to open sites by following guidelines for phase 3 and 4 re-opening. These guidelines can be found by accessing the following link:

[https://www2.illinois.gov/sites/OECD/Documents/Centers%20-%20Reopening%20Quick%20Reference%205%2729%2720\\_Final.pdf](https://www2.illinois.gov/sites/OECD/Documents/Centers%20-%20Reopening%20Quick%20Reference%205%2729%2720_Final.pdf)

As shown in Table E, DFSS Head Start programs were enrolled at 87%. Part of the recent campaigns conducted by DFSS and its CEL partners is to encourage families to enroll based on the benefits of early learning, to ensure that families understand their remote and in-person options, and also to make use of early learning resources available on the PrE-Learning website even if they choose not to enroll.

**Table E.** September 2021 Funded versus Enrolled Slots at Head Start CEL Programs

Grant	Funded Enrollment	September 2021 Enrollment	Percentage Enrolled
HS	1,489	1,291	87%
EHS	1,267	771	61%
EHS-CCP	1,100	594	54%
EHS-EXP	200	143	72%

#### IV. COVID-19 Information & Resources

##### What is the novel coronavirus (COVID-19)?

As the CDC states, the novel coronavirus is a new coronavirus that has not been previously identified. The virus causing coronavirus disease 2019 (COVID-19), is not the same as the coronaviruses that commonly circulate among humans and cause mild illness, like the common cold. While there are many types of human coronaviruses including some that affect the respiratory tract, COVID-19 has been recognized as a new disease that has not been previously documented in humans (CDC, 2020). The virus that causes COVID-19 is thought to spread mainly from person to person, mainly through respiratory droplets produced when an infected person coughs, sneezes, or talks. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs. Spread is more likely when people are in close contact with one another (within about 6 feet). COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in many affected geographic areas. Community spread means people have been infected with the virus in an area, including some who are not sure how or where they became infected.

##### How is COVID-19 diagnosed:

There are many tests being used to diagnose COVID-19 that the U.S. Healthcare system has authorized for use during the current emergency. All these diagnostic tests identify the virus in samples from the respiratory system, such as from nasal or nasopharyngeal swabs. Some tests are conducted at the testing site you visit, and results are available to you within minutes. Other tests must be sent to a laboratory to analyze, a process that takes several days. There are new tests being developed such as the saliva test. The saliva test is a test for COVID-19 that can be done at home using video supervision from a health professional. This kind of test is comfortable and easy, as people can collect their own samples by spitting into a tube and mailing it to a lab for processing.

### **Prevention**

The CDC and the World Health Organization (WHO) have stressed the importance of social distancing since spread is more likely when people are in close contact with one another (at least 6 feet ), wearing masks in public places, washing hands frequently, and avoiding touching the nose and mouth areas. Handwashing is one of the best ways to protect yourself and your family from getting sick. Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol.

Vaccination is currently the leading public health prevention strategy to end the COVID-19 pandemic. COVID-19 vaccines available in the United States are effective at protecting people from getting seriously ill, getting hospitalized, and even dying. As with vaccines for other diseases, people who are up to date with their COVID-19 vaccines are optimally protected. However, scientific evidence suggests that infected persons, even if vaccinated, can spread virus to others.

Early Childhood Education (ECE) programs can promote vaccinations among staff and families, including pregnant women, by providing information about COVID-19 vaccination, encouraging vaccine trust and confidence, and establishing supportive policies and practices that make getting vaccinated as easy and convenient as possible. Some ECE programs have requirements for COVID-19 vaccinations for staff.
