

# HEALTHY WATER QUALITY

## Temperature

Your temperature should be 52° F

## Nitrate

Nitrate levels should be less than 60 ppm

## Nitrite

Nitrite levels should be between 0-2 ppm

## Ammonia

Ammonia levels should be between 0-2 ppm

## pH

pH range should be 6.5-7.6

If water quality levels are off start by doing a 10 gallon siphoning of the tank and adding in the appropriate chemicals.
