

# Make the *best* even *better*...

*Upgrade to **EnduroShield**-coated glass  
and **Polaris** soft-closing hinges,  
two ingenious touches that will make your glass  
fence, and your life, just that little bit better.*

## Easy-clean glass coating

Upgrade our standard BelAire 12mm thick toughened safety glass with **EnduroShield**, an invisible, non-stick coating that reduces cleaning time by up to 90%.

By filling in the minute cavities present in standard glass, **EnduroShield** creates a super-smooth surface that grime and lime find it hard to adhere to. Your pool glass stays cleaner for longer, and it's a breeze to rinse down.

**Choose to upgrade to EnduroShield-coated glass when you order on-line, or just talk with one of our friendly sales representatives.**

## Soft, not slammed

Even though BelAire glass gates are made from toughened safety glass, a slammed glass gate will always put you on edge.

Relax. Upgrade to glass-to-glass or glass-to wall **Polaris** soft-closing hinges, and you'll never hear the bang of a slammed gate again!

**Choose to upgrade to Polaris soft-closing hinges when you order on-line, or just talk with one of our friendly sales representatives.**

## Perfectly In-Line Glass

Installing onto timber or uneven concrete and you need to keep your glass in-line?

Chose from our range of glass clamps for extra strength support and to keep all your glass panels straight.

**See full range of glass clamps in our catalogue!**
