

Gadget Panels

Made in Australia
Concepts and Design © Playtec Pty Ltd

Gadget Panels are a range of interactive activity panels designed to entertain infants and toddlers. They can be installed onto existing walls, counters, retail fixtures or as part of a free standing 'Gadget Corner' to create a self-contained play area. Strikingly themed to capture the children's attention, Gadget Panels are designed to quietly occupy infants and toddlers anywhere parents with children are welcome. Gadget Panels have no loose pieces and are ideal for public areas such as shopping centres, retailers, reception areas, waiting rooms, creches, showrooms, restaurants or anywhere space to set up play equipment is a premium.

The entertaining diversion provided by Gadget Panels will create a child friendly area that will reduce the boredom of waiting children while your staff focus to the needs of their parents. The positive impression of your business with customers is sure to bring repeat business!
