

Employee Collaboration is great.

The active collaboration between employees at any organization plays an extremely key role in shaping the overall experience of all its employees.

Microsoft Teams

But a wholesome employee experience consists of so much more than that.

These elements put together is what makes an employee experience in an organization meaningful.

Ensuring this meaningful experience though, can be quite a challenge for most firms.

And remote working only makes it harder.

Usage of Multiple applications. Historically low adoption rates. The inconvenience of constant switching between apps. These constraints make finding the right platform, all the more difficult.

Empuls on Teams makes it simple.

Empuls by Xoxoday is here to ensure that your employees experience all these benefits on one single platform. No more hassles of switching between applications.

With Empuls on MS Teams, employees can now enjoy their watercooler chats, celebrate, provide feedback, recognize & reward from within Teams itself.

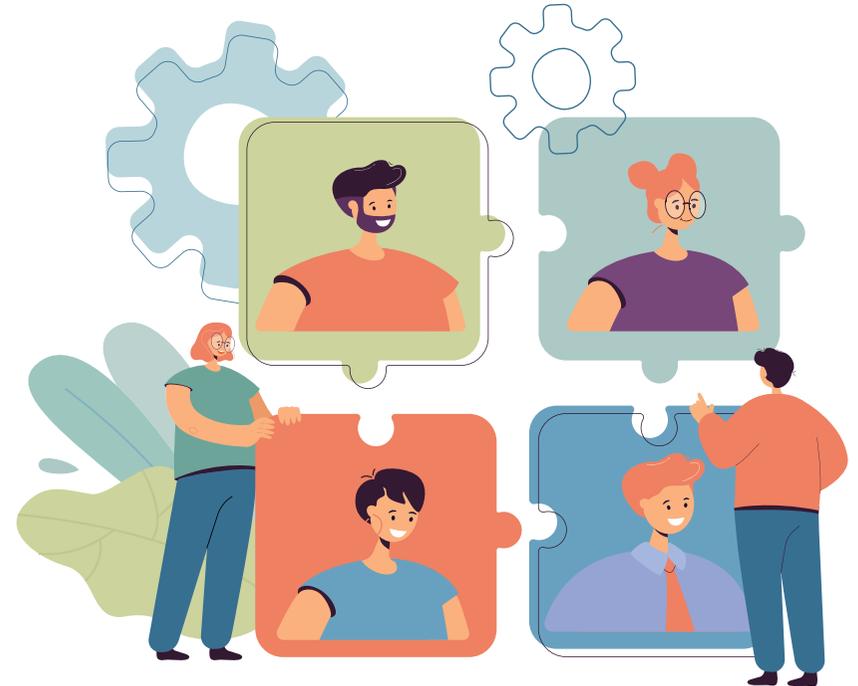

KEY FEATURES OF THIS INTEGRATION

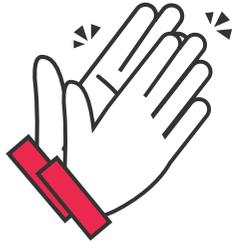

While MS Teams enables millions of employees across the globe to communicate, Empuls makes the overall employee experience even better.

● **Build a culture of Appreciation**

● **Reward employees for good work.**

● **Measure culture & engagement in real time**

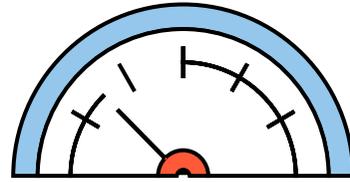

Build a culture of Appreciation

Keep employee morale high, remotely.

Action through employee engagement drivers like alignment, recognition, appreciation and rewards.

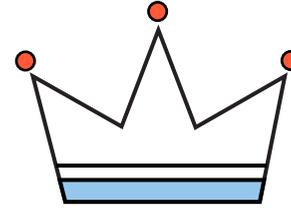

Measure culture & engagement in real time

Measure continuous improvement.

Listen to your staff, gauge feedback & understand blind spots through employee pulse surveys.

Reward employees for good work.

Reward more, reward better.

Give Kudos, Reward positive Behaviour and Celebrate personal & professional milestones from within MS Teams.

Want to experience Empuls on Teams for your employees?

- 1** Go to the MS Teams app store.
- 2** Search for Empuls App.
- 3** Click on Add to Teams!

If you are unable to find the app on your app store.

Not to worry!

Inform your MS Teams Admin to allow the Empuls third party app from Admin console.
