### Setting Higher Standards

In today's regulatory field, your compounding environment is more important than ever. Pharmacists are demanding better conditions in which to prepare aseptic products. It is their ability to develop safe, sterile medications that will be the determining factor in the ongoing health of their patients.

Travis CleanAir is dedicated to a high ethical standard - from assessment and design, to construction, delivery, and follow-up. We don't just think about modular cleanrooms, we think about all sides and every space in between. A Travis CleanAir Cleanroom Suite is built to last!

### Design Process

The initial design process can be intimidating. No one likes the idea of tearing out walls and spending thousands of dollars...that's why it is important to talk to us first. Our years of experience can help with this process.

By simply providing some initial measurements of your area, we can quickly design a cleanroom that fits the space requirements you have outlined while meeting the regulatory needs for your cleanroom.

Our design team can work with your local licensed contractors to assist with the following:

- **Electrical**
- **HVAC**
- **Plumbing**
- **Flooring**

### Delivery and Installation

We build our cleanrooms in our plant, then deliver them personally to your facility to ensure proper installation. Our goal is to limit the inconvenience to your daily business operations. Our installation crews receive high remarks all across the country for their professionalism and proficiency. They can provide technical assistance to your local contractors while onsite. After your cleanroom is in place, you will still have our support and assistance to protect your investment for years to come. With TCA's Annual Maintenance program we are able to ensure that your cleanroom maintains compliancy. From designing your custom cleanroom suite to delivery and installation, TCA handles your entire project to make certain that it meets our high standards.

### S.A.R

Our Small Acrylic Room can provide you with a quick way to become 797/800 compliant. Excellent for small applications and can be designed for a positive or negative pressure environment. The acrylic panels that are used aid in visibility within your pharmacy and allow for a more spacious feel while working in the cleanroom.

- **Inside finished ceiling height ranges from 7'2" to 10'**
- **Will accommodate up to a 4' LAFW or BSC**
- **Can be configured for positive or negative pressure**
- **Modular design allows for future expansion**
- **Magnahelic gauges and a Pass Through box are included**

### TCA Annual Maintenance Program

USP regulations are continuously changing, and it is important to keep your cleanroom up-to-date and running efficiently. TCA is now offering an annual maintenance program which includes an annual visit to your facility to complete a comprehensive inspection of your cleanroom suite.

- **Annual cleanroom inspection by a TCA crew to ensure operation efficiency**
- **A comprehensive inspection of entire cleanroom suite**
- **Acrylic return cleaning to maximize efficiency and longevity**
- **Complete inspection report provided for facility records**
- **Hands-on support for all your cleanroom questions and maintenance needs**
- **Includes 20% discounted price on all cleanroom component upgrades or replacement parts**
- **Have documentation of your efforts to remain compliant**

### Financing/Leasing Options

TCA works with several leasing companies that offer many flexible leasing options. Please contact us to hear about current offers and promotions.

### Mobility: Never Lose Your Investment

Our TCA system of design allows the rooms to be modified. As your compounding business increases and you need more space, the room can be enlarged to accommodate your growth. If your physical address must change, the cleanroom can be disassembled, moved, and re-assembled at your new location. We can reassure that you never lose your initial investment.

### Choose TCA

With TCA, you will find a company that is committed to you.

**We listen by design, and deliver solutions that get results.**
